1.0 BACKGROUND

Over the last decade, Caltrain has experienced a substantial increase in ridership and anticipates further increases in ridership demand as the San Francisco Bay Area's population grows. The Caltrain Modernization (CalMod) Program, scheduled to be implemented by 2021, will electrify and upgrade the performance, operating efficiency, capacity, safety, and reliability of Caltrain's commuter rail service.

The PCEP is a key component of the CalMod Program and consists of converting Caltrain from diesel-hauled to Electric Multiple Unit (EMU) trains for service between the San Francisco Station (at the intersection of Fourth and King Streets in San Francisco) and the Tamien Station in San Jose. Caltrain will continue Gilroy service and support existing tenants.

An electrified Caltrain will better address Peninsula commuters' vision of environmentally friendly, fast and reliable service. Electrification will modernize Caltrain and make it possible to increase service while offering several advantages in comparison with existing diesel power use, including:

- Improved Train Performance, Increased Ridership Capacity and Increased Service: Electrified trains can accelerate and decelerate more quickly than dieselpowered trains, allowing Caltrain to run more efficiently. In addition, because of their performance advantages, electrified trains will enable more frequent and/or faster train service to more riders.
- Increased Revenue and Reduced Fuel Cost: An electrified Caltrain will increase ridership and fare revenues while decreasing fuel costs.
- Reduced Engine Noise Emanating from Trains: Noise from electrified train
 engines is measurably less than noise from diesel train engines. Train horns will
 continue to be required at grade crossings, adhering to current safety regulations.
- Improved Regional Air Quality and Reduced Greenhouse Gas Emissions:
 Electrified trains will produce substantially less corridor air pollution compared with
 diesel trains even when the indirect emissions from electrical power generation are
 included. Increased ridership will reduce automobile usage, resulting in additional
 air quality benefits. In addition, the reduction of greenhouse gas emissions will
 improve our regional air quality, and will also help meet the state's emission
 reduction goals.

2.0 EXECUTIVE SUMMARY

The Monthly Progress Report is intended to provide an overview of the PCEP and provide funding partners, stakeholders, and the public an overall update on the progress of the project. This document provides information on the scope, cost, funding, schedule, and project implementation. Work along the Caltrain Electrification Corridor has been divided into four work segments and respective work areas (WA) as shown in Figure 2-1. PCEP activities are described and summarized by segments and work areas.

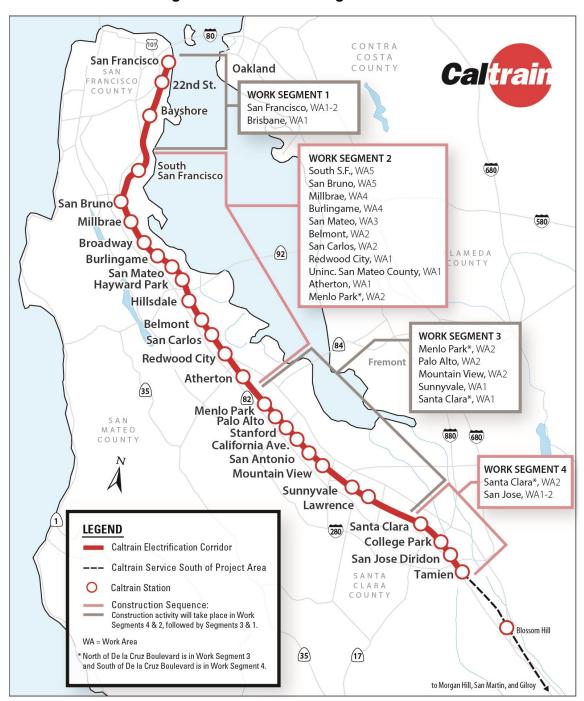

Figure 2-1 PCEP Work Segments

Crews began installing off-track Overhead Catenary System (OCS) foundations in Segment 1 near the Bayshore Station, and on-track foundation and pole installation continued in Segments 3 and 4. At this point more than half the poles needed for the project have been installed. Transformer pads were installed at Paralleling Station (PS) PS-5 and PS-2, and conduit and the auxiliary transformer pad were installed at PS-4. PS-6 work included wall construction. Crews maintained normal productivity by continuing construction activities such as potholing, relocating signal cables, installation of ductbank, conduits, and cables, switch isolations, installation of overhead bridge attachments, and progressing design with BBII.

There have been no changes to the EMU assembly and testing disruptions due to Coronavirus Disease 2019 (COVID-19). However, as EMU manufacturing of cars and shells is still on schedule, Stadler now reports receipt of six car shells in Salt Lake City and six more in transit. At the Centralized Equipment Maintenance and Operations Facility (CEMOF), the parts storage warehouse installation began. Footings and the south wall were poured for the south pit, and the drain trench was installed.

The Traction Power Substation (TPS-2) construction mobilization has been scheduled for mid-September, and the TPS-1 mobilization is anticipated for January. TPS-1 permits have been submitted and the environmental release to construction has been received.

2.1. Monthly Dashboards

Dashboard progress charts are included below to summarize construction progress.

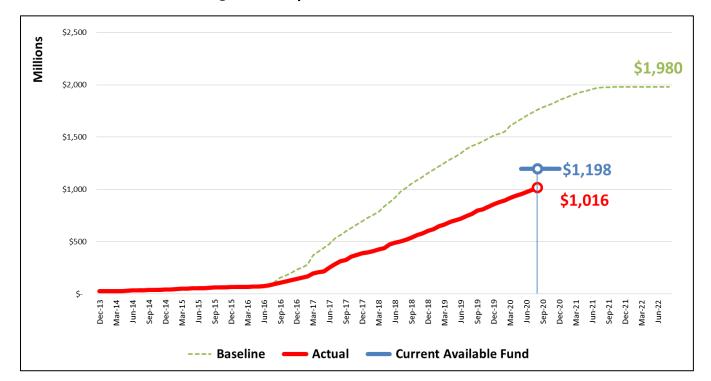

Figure 2-2 Expenditure – Planned vs. Actual

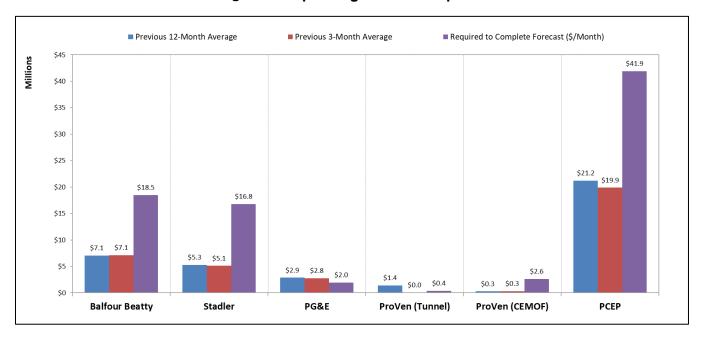

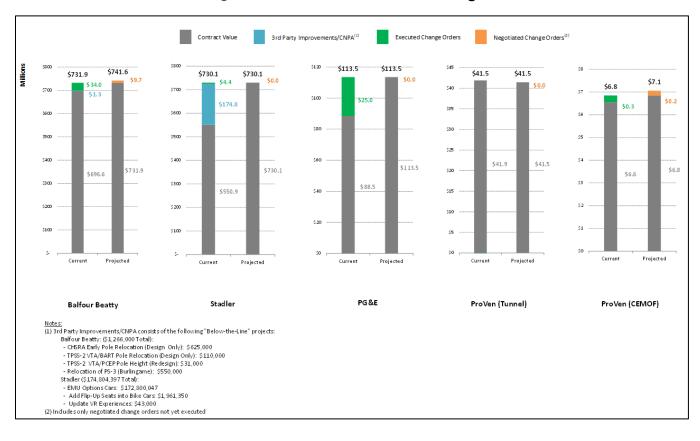

Figure 2-3 Spending Rate vs. Required

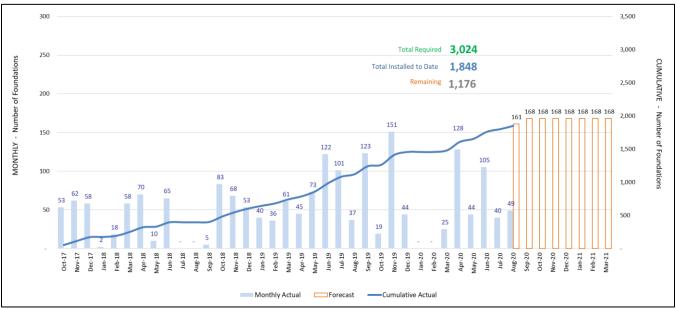

Figure 2-5 OCS Foundation Production

BBII is now reporting a delay in the completion date for the OCS foundations from December 31, 2020 to March 31, 2021. The monthly forecast will be revised at the end of ongoing OCS foundation workshops, which are held to determine the level of effort necessary for each of the activities prior to foundation installation. The delay to the OCS foundation completion date did not change the substantial completion date of the BBII contract.

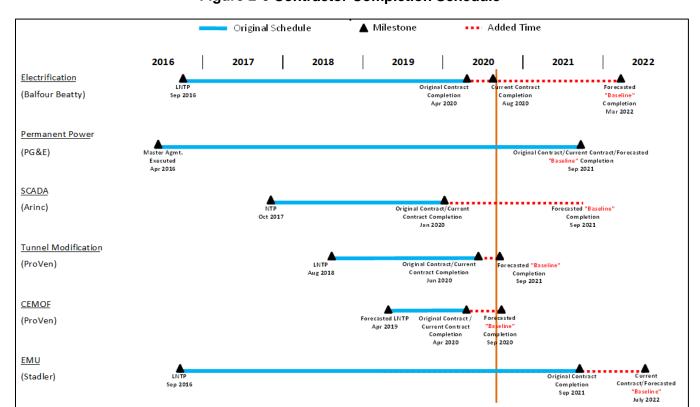

Figure 2-6 Contractor Completion Schedule

2.2. Funding Partners Participation in PCEP

The PCEP has a series of weekly, biweekly, monthly and quarterly meetings to coordinate all aspects of the program. The meetings are attended by project staff with participation by our funding partners in accordance with the Funding Partners Oversight Protocol. A summary of funding partner meetings and invitees can be found in Appendix B.

This section of the report provides a summary of the discussions and decisions made at the meetings and a list of funding partners who attended the meetings.

Electrification – Weekly Discipline-Specific Meetings

Purpose: To replace the previous weekly Engineering Meeting with three discipline-specific meetings for the three major categories of work under the Electrification Design Build (DB) contract: Overhead Contact System (OCS) Foundation, Traction Power Facilities (TPF), and Signals. Each meeting will focus on the status, resolution and tracking of Balfour Beatty Infrastructure, Inc. (BBII) and Electrification design- and construction-related issues.

Activity this Month

OCS Foundation Meeting

Funding Partners: None

- Review of upcoming foundation design and installation schedule
- Discussion of open issues impacting foundations design and installation
- Discussion of outstanding Requests for Information (RFI)
- Review of foundation designs that potentially impact Right of Way (ROW)
- Review of outstanding Field Orders or Change Notices required for work to continue

TPF Meeting

Funding Partners: None

- Review of outstanding items as they relate to the design and construction of the PG&E Interconnection
- Review of status of long-lead material procurement
- Review of PG&E Interconnection schedule
- Discuss progress and next steps for the Single-Phase Study
- Discuss outstanding comments on the interconnection agreement
- Review and resolve open issues on the construction and design of the TPFs (paralleling stations, traction power substations, switching station)

Signal Meeting

Funding Partners: None

- Discussion of design, installation and testing of the signal and communication modifications to the Caltrain system
- Discussion of outstanding comments and responses to comments on signal and communication design packages
- Review of schedule for signal and communication cutover plans
- Discuss and resolve RFIs

PCEP Delivery Coordination Meeting – Bi-Weekly

Purpose: To facilitate high-level coordination and information sharing between crossfunctional groups regarding the status of the work for which they are responsible.

Activity this Month

Funding Partners: SFCTA: Luis Zurinaga; MTC: Trish Stoops; VTA: Franklin Wong

In Contracts and Procurement, sole-source contract amendments for On-Call Program Management Support Services and On-Call Electrification Support Services have been fully executed to increase contract capacities and allow JPB to continue with the Fiscal Year 2021 consultant support work directives. In EMU testing and manufacturing, type testing for Trainset 1 continues to be delayed due to restrictions caused by COVID-19. Stadler is adding resources to assist in the troubleshooting for Trainset 1. The shipment of trains to Pueblo is currently on target for November. The redesign of the bike car barriers is in action to address Federal Railroad Administration (FRA) comments. For CEMOF, the parts storage warehouse steel erection occurred and wiring work in the equipment room is ongoing. In the inspection pits, waterproofing is being done at the north end and rebar installation is being done at the south end. For Design Build activities, foundation installation is ongoing in Segment 4 and Segment 3 and projected to be completed by the end of the month. Off-track foundation installation for Segment 1 has been pushed to the end of August/early September and the delivery of cages is expected by mid-August. A draft agreement is in process for Santa Clara Valley Water District and the installation of foundations in Marchese is targeted by the end of August. Fence relocation at PG&E Cinnabar is scheduled to start on August 5 with temporary lighting work occurring in parallel, and the target to install foundations is by the end of August. For the Tunnel Modification Project, Neta Testing will be onsite by September 14 to start testing at all tunnels.

Systems Integration Meeting – Bi-Weekly

Purpose: To discuss and resolve issues with inter-system interfaces and to identify and assign Action Item Owners for interface points that have yet to be addressed.

Activity this Month

Funding Partners: None

Bi-weekly PCEP System Integration meetings are held to monitor and determine appropriate resolution for systems integration issues. The Systems Integration Lead also maintains contact with the EMU procurement team. The Traction Power SCADA team also holds bi-weekly status meetings. Coordination with the EMU procurement, PTC and Caltrain Capital Project managers responsible for delivery of the 25th Avenue Grade Separation Project, Marin Napoleon Bridge Rehabilitation Project, and the South San Francisco Station Project is ongoing. Discussions have started regarding an upcoming capital project to replace the Guadalupe River Bridge. There is coordination with the Tunnel Modification Project, PG&E construction of the Interconnection to TPS-2, and the CEMOF upgrades as well. Progress on activities including systems integration testing activities, FRA, FTA and safety certification are being tracked. The Systems Integration meeting has been re-focused to track and coordinate issues between PCEP and the overall agency (JPB). This was done to avoid task overlap with the JPB Rail Activation Committee. A smaller "breakout" group is meeting to determine and track what testing and with which resources will need to be coordinated among the various contracts and suppliers. This "Testing and Commissioning Meeting" is the primary interface to the PCEP Design-Build Team at this time. Work to define dependencies for completion of Segment 4 (Intermediate Milestone #1) is ongoing with the Testing & Commissioning discussion. This group will report back to the System Integration meeting group with their findings.

Master Program Schedule (MPS) Meeting - Monthly

Purpose: To review the status of the MPS and discuss the status of major milestones, critical and near-critical paths, upcoming Board review items, and progress with the contracts, among others.

Activity this Month

Funding Partners: Metropolitan Transportation Commission (MTC): Trish Stoops; VTA: Manolo Gonzalez-Estay, SFCTA: Luis Zurinaga

The program critical path remains unchanged and continues to run through the manufacturing and testing of EMU trainsets.

In July 2020, the program schedule was updated to reflect additional non-critical path COVID-19 related delays to Stadler's assembly and test of EMU trainsets. These delays have resulted in later forecasted dates for arrival of the first trainset in Pueblo, CO as well as arrival of the first trainset on JPB property.

BBII's efforts on design and installation of the signal system continues to progress slowly. This has resulted in a further delay to substantial completion of the electrification system. JPB is working with BBII on the issue and is urging BBII to accelerate resolution.

Risk Assessment Meeting – Monthly

Purpose: To identify risks and corresponding mitigation measures. For each risk on the risk register, mitigation measures have been identified and are being implemented. Progress in mitigating these risks is confirmed at the ongoing risk monitoring and monthly risk assessment meetings.

Activity this Month

Due to the absence of issues requiring review, no meeting was held in August.

Change Management Board (CMB) – Monthly

Purpose: To review, evaluate and authorize proposed changes to PCEP over \$200,000. The CMB discusses major topics including potential changes to PCEP contracts, contingency usage, track access delays and Differing Site Conditions (DSC) field order updates. Potential contract changes will follow the PCEP Change Order Procedure. Once approved changes are executed, they will be reported in the Change Management section (Section 9) of this report.

Activity this Month

The CMB meeting occurred on August 19.

Funding Partners: CHSRA: Boris Lipkin and Simon Whitehorn; VTA: Krishna Davey and Edwin Castillo; SFCTA: Luis Zurinaga; SMCTA: Joe Hurley; MTC: Trish Stoops and Kenneth Folan; FTA: Mike Eidlin

BBII Contract

One change was approved.

CEMOF Contract

No changes were identified for consideration.

Stadler Contract

No changes were identified for consideration.

SCADA Contract

No changes were identified for consideration.

SCADA Contract

No changes were identified for consideration

Tunnel Modification Contract

No changes were identified for consideration.

Amtrak Contract

No changes were identified for consideration.

<u>Other</u>

No changes were identified for consideration.

2.3. Schedule

The program critical path remains unchanged and continues to run through the manufacturing and testing of EMU trainsets.

In July 2020, the program schedule was updated to reflect additional non-critical path COVID-19 related delays to Stadler's assembly and test of EMU trainsets. These delays have resulted in later forecasted dates for arrival of the first trainset in Pueblo, CO as well as arrival of the first trainset on JPB property.

BBII's effort on design and installation of the signal system continues to progress slowly. This has resulted in a further delay to substantial completion of the electrification system. JPB is working with BBII on the issue and is urging BBII to accelerate resolution.

Table 2-1 indicates major milestone dates for the MPS.

Table 2-1 Schedule Status

| Milestones | Program Plan | Progress Schedule (August 2020) ¹ |
|---|--------------|---|
| Arrival of First Vehicle in Pueblo, CO | N/A | 11/25/2020 ² |
| Arrival of First Vehicle at JPB | N/A | 04/30/20212 |
| Segment 4 Completion | 11/21/2019 | 06/30/20212 |
| Interconnection from PG&E Substation to Traction Power Substation (TPS) | N/A | 12/10/2020 |
| PG&E Provides Permanent Power | 09/09/2021 | 09/09/2021 |
| Electrification Substantial Completion | 08/10/2020 | 03/26/20222 |
| Start Phased Revenue Service | N/A | 03/27/2022 |
| RSD (w/o Risk Contingency) | 12/09/2021 | 07/22/2022 |
| FFGA RSD (w/ Risk Contingency) | 08/22/2022 | 08/22/2022 |

Note:

Dates may shift slightly as the update of this month's Progress Schedule is still in process.

^{2.} See "Notable Variances" in Section 7 for explanation on date shift.

2.4. Budget

A summary of the overall budget and expenditure status for the PCEP is provided in Table 2-2 below.

Table 2-2 Budget and Expenditure Status

| Description of Work | Budget (A) | Current Budget (B) ¹ | Cost This Month (C) ² | Cost To Date (D)³ | Estimate To Complete (E) | Estimate At Completion (F) = (D) + (E) |
|--------------------------|-----------------|---------------------------------------|--|-------------------------|--------------------------------|--|
| Electrification Subtotal | \$1,316,125,208 | \$1,316,125,208 | \$11,712,965 | \$776,203,876 | \$539,921,332 | \$1,316,125,208 |
| EMU Subtotal | \$664,127,325 | \$664,127,325 | \$7,472,245 | \$239,758,580 | \$424,368,745 | \$664,127,325 |
| PCEP TOTAL | \$1,980,252,533 | \$1,980,252,533 | \$19,185,210 | \$1,015,962,456 | \$964,290,077 | \$1,980,252,533 |

Notes regarding tables above:

2.5. Board Actions

Change order with BBII for construction of shunt wires at utility crossings

Future anticipated board actions include:

• Change orders as needed

2.6. Government and Community Affairs

There were three outreach event this month.

^{2.} Column B "Current Budget" includes executed change orders and awarded contracts.

^{3.} Column C "Cost This Month" represents the cost of work performed this month.

^{4.} Column D "Cost To Date" includes actuals (amount paid) and accruals (amount of work performed) to date.

3.0 ELECTRIFICATION - INFRASTRUCTURE

This section reports on the progress of the Electrification, SCADA, and Tunnel Modification components. A brief description on each of the components is provided below.

3.1. Electrification

The Electrification component of the PCEP includes installation of 138 miles of wire and overhead catenary system (OCS) for the distribution of electrical power to the EMUs. The OCS will be powered from a 25 kilovolt (kV), 60-Hertz, single phase, alternating current supply system consisting of two traction power substations (TPS), one switching station (SWS), and seven paralleling stations (PS). Electrification infrastructure will be constructed using a DB delivery method.

Activity This Month

- Continued to install on-track and off-track foundations in Segments 3 and 4 as conflicts are resolved.
- Continued installation of OCS poles, cantilevers, and wires in Segment 3 following the foundations.
- Continue installation of shunt wires in Segment 2.
- Began installation of off-track foundations in Segment 1 near the Bayshore Station.
- Potholed at proposed OCS locations and utility locations in all Segments in advance of foundation installation. BBII and PCEP also continued to resolve conflicts found during the potholing process, such as loose concrete, asphalt, and other debris, and continued designing solutions for those conflicts that cannot be avoided. The conflicts must be resolved before installation of foundations at those locations.
- Relocated signal cables and remove abandoned facilities found in conflict with planned OCS foundations as conflicts were identified.
- Continued installation of transformer pad at PS-5.
- Continued installation of transformer pad at PS-2.
- Continued conduit and auxiliary transformer pad installation at PS-4.
- Continued CMU wall construction at PS-6.
- Continued to install signal ductbank, conduits, and cables in Segment 2.
- Continued to install signal ductbank, conduits, and cables in Segment 4.
- Continued cable installation at Control Point (CP) Shark, CP Michael, and Luther Junction.
- Performed cable termination at CP Shark, CP Michael, and Luther Junction.
- Install signal case at CP Coast Main.
- Performed pre-testing at multiple signal locations.
- Continued drilling of rails for impedance bond connections in Segments 1, 2, 3 and 4 at various control points and crossings.

- Performed switch isolation in Segment 1 and Segment 2.
- Install overhead bridge attachments at various locations in Segment 3.
- Progressed the OCS design with BBII in all segments, which included submittal and review of Design Change Notices for revised foundation locations.
- Continued Right of Way acquisition process for off-track foundation installation in Segment 1.
- Coordinated design review with local jurisdictions for the OCS, traction power facilities, and bridge attachments design, including responses to comments from jurisdictions.
- Continued to review and coordinate signal and communication design submittals with BBII.
- Continued discussions with FRA and CPUC on grade crossing design.
- Continued planning for signal cutovers in Segment 4.
- Contractor has been selected by PG&E for TPS-2 interconnection. Continued discussions with VTA on Right of Way acquisition and access for construction of TPS-2 interconnection.
- Continued coordination with VTA on utility relocation required prior to start of TPS-2 interconnection construction.
- Worked with BBII through Site Specific Work Plans (SSWP) for upcoming field work
- Completed draft model validation for the single phase study and presented results to PG&E.
- PG&E continued work at East Grand and FMC substations.

A summary of the work progress by segment is provided in Table 3-1 below.

Table 3-1 Work Progress by Segment

| | Foundations | | | Poles | | | |
|---------|-------------|-------------|----------------------|-------------------|------------|----------------------|--------------------|
| Segment | Work Area | Requiredabc | Completed this Month | Completed to Date | Requiredab | Completed this Month | Completed to Dated |
| | Tunnels | 32 | 0 | 32 | 32 | 0 | 32 |
| 1 | Α | 309 | 0 | 0 | 259 | 0 | 0 |
| | В | 237 | 9 | 9 | 177 | 0 | 0 |
| | 5 | 236 | 0 | 199 | 209 | 0 | 160 |
| | 4 | 314 | 0 | 238 | 254 | 0 | 190 |
| 2 | 3 | 176 | 0 | 129 | 141 | 0 | 36 |
| | 2 | 247 | 0 | 78 | 205 | 0 | 60 |
| | 1 | 207 | 0 | 79 | 154 | 0 | 33 |
| 3 | 2 | 510 | 10 | 497 | 441 | 17 | 322 |
| 3 | 1 | 387 | 3 | 371 | 310 | 26 | 261 |
| | Α | 241 | 16 | 195 | 177 | 4 | 112 |
| 4 | В | 128 | 11 | 107 | 123 | 16 | 86 |
| | CEMOF | 96 | 0 | 0 | 81 | 0 | 0 |
| Total | | 3,120 | 49 | 1,934 | 2,563 | 63 | 1,292 |

Note:

- Continue off-track foundation installation in Segment 1.
- Continue foundation installation in Segments 3 and 4.
- Install spread footing foundation at CP De la Cruz.
- Continue resolution of DSCs.
- Continue to install protective steel plates for protection of utilities during foundation installation.
- Continue to install OCS poles and assemblies in all Segments where available.
- Continue wire installation in Segments 3 and 4.
- Continue shunt wire installation in Segment 2.
- Continue work with BBII on field investigation activities and designs, which will
 include the progression of the OCS, traction power, bonding and grounding, signal
 systems, and other civil infrastructure such as overhead bridge protections.
- Pothole and clear obstructions at proposed OCS locations. Potholing will concentrate in Segments 3 and 4, as well areas of potential ROW needs in Segments 1 and 2.
- Continue construction at TPS-1.
- Continue construction at PS-7, PS-5, PS-4, PS-6, PS-2, and the Switching Station.

^{a.} Foundations required do not match poles required as guy foundations are needed in some locations for extra support.

b. Reported number of required poles and foundations fluctuate due to Design changes.

^{c.} Update: To-date, 20 /30 foundations have been installed by the South San Francisco and 66 have been installed by the 25th Ave projects.

d. Two poles in S3WA2 and two poles in S3WA1 were unreported installed in July 2020.

- Continue to install conduit and foundations for signal and wayside power cubicle (WPC) units in Segment 4 and Segment 2.
- Continue cable termination at signal locations in Segment 4.
- Continue to install impedance bond connections.
- Continue to install bridge attachments.
- Relocate signal utilities prior to start of TPS-2 interconnection construction.
- Begin TPS-2 interconnection construction.
- Continue to coordinate with stakeholders on the consistent warning time solution and advance location-specific design.
- Continue to progress location-specific design for grade crossing system.
- Continue planning process for signal cutovers.
- Review BBII work plans for upcoming construction activities.
- Coordinate with PG&E on final design and construction for PG&E infrastructure.
- Coordinate with local jurisdictions to review designs.
- Continue tree pruning and removals.

3.2. Supervisory Control and Data Acquisition

SCADA is a system that monitors and controls field devices for electrification, including traction power substations (TPS), wayside power cubicles (WPC), and the OCS. SCADA will be integrated with the base operating system for Caltrain Operations and Control, which is the Rail Operations Center System (ROCS). A separate control console will be established for the Power Director.

Activity This Month

- Submitted formal schedule for review and Monthly Progress Report.
- Completed writing SCADA Operations User Manual.
- Completed Installation and Cutover Plan.
- Completed writing Training Manual.
- Began work on correcting defects found during Pre-Factory Acceptance Testing (FAT).
- Attended first meeting for developing Configuration Change Work Plan (CCWP), part of the JPB Configuration Management process.

- Prepare and deliver the Monthly Report and the Monthly Schedule Update.
- Attend project status meetings (virtually).
- Support ongoing discussions concerning RFIs.
- Complete correction of defects found during Pre-FAT.
- Address comments received for Operations User Manual.
- Address comments received for Training Manual.

Complete Training Plan.

3.3. Tunnel Modification

Tunnel modifications will be required on the four tunnels located in San Francisco. This effort is needed to accommodate the required clearance for the OCS to support electrification of the corridor. Outside of the PCEP scope, Caltrain Engineering has requested the PCEP team to manage completion of design and construction for the Tunnel 1 and Tunnel 4 Drainage and Track Rehabilitation Project. The Tunnel Drainage and Track Rehabilitation Project is funded separately from PCEP.

Activity This Month

- Letters, submittals, and Requests for Information closeout.
- Change Order reconciliation.

Activity Next Month

- Review and respond to letters.
- Install signage inside all tunnels.
- OCS Testing (Neta Testing).
- Punch List items.

3.4. Interconnection Construction

The PCEP will require a 115-kV interconnection to supply power from the PG&E substations to the Caltrain substations in San Jose and South San Francisco. Construction of the interconnections will be performed by PG&E under an amendment to Supplemental Agreement No. 2.

Activity This Month

- FMC TPS-2:
 - Caltrans permit to cross I-880/remove trees submitted.
 - Environmental release to construction for JPB received.
 - Mobilization scheduled for September 15.
- EGS TPS-1:
 - Overhead: Sub-contractor Michel's selected. Mobilization forecasted in January.
 - Underground: Ductbank and underground redundant fiber request for proposal forecasted for October. Subcontractor selection forecasted for November. Mobilization forecasted for February.

- FMC TPS-2:
 - Staging TPS-2: Communication vaults delivered to site 9/10; Overhead structures 10/23.

- EGS TPS-1:
 - Coordinate the TSP pole design with South San Francisco team.
 - Staging EGS & TPS-1: Poles delivered to site 1/27/21, cable vaults 2/5/21 and cable 3/5/21. PG&E to coordinate with the property owner for staging at TPS-1.

4.0 ELECTRIC MULTIPLE UNITS

This section reports on the progress of the Electric Multiple Units (EMU) procurement and the Centralized Equipment Maintenance and Operations Facility (CEMOF) modifications.

4.1. Electric Multiple Units

The procurement of EMUs, or trainsets, from Stadler consists of a Base Order of 96 railcars, plus an Option Order of an additional 37 railcars, for a total of 133 railcars. The cars from these two orders will be combined and delivered as 19 seven-car Trainsets. The Base Order is funded from PCEP, and Option Order funded by a Transit and Intercity Rail Capital Program (TIRCP) grant. One more Option for additional cars is available.

Activity This Month

- COVID-19 related actions continued for the sixth month causing mixed disruptions to Stadler's activities:
 - Stadler's three manufacturing facilities (two in Switzerland and one in Salt Lake City) supporting the Caltrain Project have returned to near normal levels of activity.
 - The Switzerland-based manufacturing of car shells and trucks frames is on schedule.
 - Salt Lake City-based manufacturing is delayed due to previously incurred person-power limitations and sub-supplier parts shortages.
 - Stadler has submitted a request for an 'excusable delay' due to COVID-19. The extent of the continuing delay is being evaluated. Currently, shipping the first trainset to Pueblo, Colorado for testing has been delayed 3 months to November 2020, and the first trainset to be delivered to Caltrain delayed 6 weeks to the end of April 2021.
 - Salt Lake City-based 'Type Testing' of Trainset No. 1 continues to be on hold since key Stadler and sub-supplier personnel cannot travel to the United States. The current delay in testing is estimated at one day for each day of COVID-19 travel restrictions.
 - Stadler has material for about three trainsets, but the disrupted supply chain will likely create shortages and production delays.
- Final Design Reviews remain to be completed for three systems. These software-based systems include 'Train Control,' 'Monitoring and Diagnostics,' and 'Car Control.' Completion is scheduled for August 2020 and must be performed prior to the commencement of Type Testing.
- First Article Inspections (FAI) continue to have their paperwork formalized and closed out.
- 46 car shells have been shipped from Stadler Switzerland, with 40 onsite in Stadler's Salt Lake City facility (six in transit).
- Quality Assurance audits of USA-based sub-suppliers were halted in mid-March due to COVID-19 travel restriction. Audits will commence when sub-suppliers reopen.

 Stadler's trainset delivery and testing schedule on Caltrain property has been rebaselined.

Activity Next Month

- Continue to close out system level FDRs and FAIs.
- Continue to support Caltrain/PCEP system integration and rail startup activation activities

4.2. Centralized Equipment Maintenance and Operations Facility Modifications

The CEMOF Modifications Project will provide work areas to perform maintenance on new EMUs.

Activity This Month

- Erection of the Parts Storage Warehouse started.
- Shoring Design for the shallow fire sprinkler line ongoing.
- Installed the trench drain at the south pit.
- Installed Water stops and shutoffs at the south pit.
- Poured the footing and south wall at the south pit.
- Shop drawings for the CMU wall at the Component Test Room are ongoing.

- Submit shoring design for shallow fire sprinkler line.
- Strip forms and allow south wall concrete to cure.
- Complete erection of the Parts Storage Warehouse.
- Install fire sprinkler at Parts Storage Warehouse.

5.0 SAFETY

Safety and Security requirements and plans are necessary to comply with applicable laws and regulations related to safety, security, and emergency response activities. Safety staff coordinates with contractors to review and plan the implementation of contract program safety requirements. Safety project coordination meetings continue to be conducted on a monthly basis to promote a clear understanding of project safety requirements as defined in contract provisions and program safety documents.

Activity This Month

- Project staff provided input and continued its participation in the BBII contractor workforce safety meetings. Project incidents continue to be reviewed with project staff to reinforce the application of recommended safety mitigation measures.
- Conducted 2020 monthly employee injury reviews for BBII and its subcontractors.
- Continued to provide input and oversight of the contractor SSWP safety provisions and ongoing safety construction oversight and inspections.
- Conducted the monthly project Safety and Security Certification and Fire/Life Safety Meetings.
- Performed reviews and provided comments on the BBII Safety and Security Certification Design Criteria Conformance Checklists (DCCC) submittals.
- Participated with internal stakeholders in Rail Activation Committee meetings.
- Investigated project incident occurrences and worked with the contractor representatives to identify incident root causes and develop and implement safety and security mitigation measures.
- Reviewed 2020 incident recommendations and lessons learned with BBII and identified opportunities to reinforce safety measures.
- Conducted ongoing safety inspections of contractor field activities and performed pre-work site hazards assessment walks with BBII and subcontractor staff.
- Performed hi-rail vehicle safety inspections of contractor on-track equipment.
- Participated in weekly project coordination meetings with the contractor to review open issues and recommended action items.
- Continued to coordinate with JPB Safety and the project contractors with the application of mitigation measures in response to the evolving COVID-19 virus.

- Monthly virtual safety communication meetings continue to be scheduled for the Project Safety and Security Certification Committee, Fire/Life Safety Committee, Rail Activation Committee, and other project-related contractor and JPB safety meetings to discuss safety priorities.
- Continue focus on performing site safety inspections on the OCS foundations, pole installations, potholing, Tunnel, and CEMOF work to assess safety work practices and identify additional opportunities for improvement. Conduct contractor equipment inspections as needed.

Peninsula Corridor Electrification Project

Monthly Progress Report

- Continue to meet with the PCEP contractors, JPB safety, and TransitAmerica Services, Inc. (TASI) to identify opportunities to further improve project safety performance and continue to reinforce lessons learned safety mitigation recommendations resulting from prior project incidents.
- Reinforce the ongoing application of recommended mitigation measures in response to the evolving COVID-19 virus.
- Investigate project incident occurrences as needed and work with the contractor representatives to identify incident root causes and develop and implement safety and security mitigation measures.

6.0 QUALITY ASSURANCE

The Quality Assurance (QA) staff performs technical reviews for planning, implementing, evaluating, and maintaining an effective program to verify that all equipment, structures, components, systems, and facilities are designed, procured, constructed, installed, and maintained in accordance with established criteria and applicable codes and standards throughout the design, construction, startup and commissioning of the PCEP.

Activity This Month

- Staff meetings with BBII QA/Quality Control (QC) management representatives continue weekly.
- Continued review of BBII-generated Nonconformance Reports (NCR) and Construction Discrepancy Reports for proper discrepancy condition, cause, disposition, corrective and preventive action and verification of closure.
- Continued review and approval of Design Variance Requests for BBII and PGH Wong for QA/QC and inspection issues/concerns.
- Continued review of BBII QC Inspectors Daily Reports, Construction QC Reports and Surveillance Reports for work scope, performance of required duties, adequacy, non-conformances, test/inspection results, follow-up on unresolved issues, and preciseness.
- Continued review of BBII Material Receipt Reports, Certificates of Conformance, Certified Tests Reports, and Certificates of Analysis to ensure delivered project materials conform to specifications, and that contractually required quality and test support documents are adequate and reflect concise conditions per the purchase order requirements.
- Continued regularly scheduled design reviews and surveillances on project design packages.

Completed a Field Activities audit of BBII/MRS Signal Houses at Luther and Shark with one Finding. Table 6-1 below provides details on the status of audits performed through the reporting period.

Table 6-1 Quality Assurance Audit Summary

| Quality Assurance Activity | This Reporting Period | Total to Date | | | | |
|----------------------------|-----------------------|---------------|--|--|--|--|
| Audits Conducted | 1 | 122 | | | | |
| Audit Findings | | | | | | |
| Audit Findings Issued | 1 | 79 | | | | |
| Audit Findings Open | 3 | 3 | | | | |
| Audit Findings Closed | 8 | 76 | | | | |
| Non-Conformances | | | | | | |
| Non-Conformances Issued | 0 | 10 | | | | |
| Non-Conformances Open | 0 | 1 | | | | |
| Non-Conformances Closed | 0 | 9 | | | | |

- Conduct field surveillances at TPS-2.
- Conduct a Part 2 Audit of BBII second shift OCS Poles and Wires.

7.0 SCHEDULE

The program critical path remains unchanged and continues to run through the manufacturing and testing of EMU trainsets.

In July 2020, the program schedule was updated to reflect additional non-critical path COVID-19 related delays to Stadler's assembly and test of EMU trainsets. These delays have resulted in later forecasted dates for arrival of the first trainset in Pueblo, CO as well as arrival of the first trainset on JPB property.

BBII's effort on design and installation of the signal system continues to progress slowly. This has resulted in a further delay to substantial completion of the electrification system. JPB is working with BBII on the issue and is urging BBII to accelerate resolution.

Shown below, Table 7-1 indicates major milestone dates for the MPS.

Table 7-1 Schedule Status

| Milestones | Program Plan | Progress Schedule (August 2020) ¹ |
|---|-----------------|---|
| Arrival of First Vehicle in Pueblo, CO | N/A | 11/25/2020 ² |
| Arrival of First Vehicle at JPB | N/A | 04/30/20212 |
| Segment 4 Completion | 11/21/2019 | 06/30/2021 ² |
| Interconnection from PG&E Substation to Traction Power Substation (TPS) | N/A | 12/10/2020 |
| PG&E Provides Permanent Power | 09/09/2021 | 09/09/2021 |
| Electrification Substantial Completion | 08/10/2020 | 03/26/20222 |
| Start Phased Revenue Service | N/A | 03/27/20222 |
| RSD (w/o Risk Contingency) | 12/09/2021 | 07/22/2022 |
| FFGA RSD (w/ Risk Contingency) | 08/22/2022 | 08/22/2022 |

Note:

Notable Variances

In July 2020, the program schedule was updated to reflect additional non-critical path COVID-19 related delays to Stadler's assembly and test of EMU trainsets. These delays have resulted in later forecasted dates for arrival of the first trainset in Pueblo, CO as well as arrival of the first trainset on JPB property.

BBII continues to report an overall delay to substantial completion. JPB is working with BBII on the issue and is urging BBII to accelerate resolution. As of the end of August, the one month delay to substantial completion is due to signal system modification design and installation progressing slower than the progress assumed in the baseline schedule.

^{1.} Dates may shift slightly as the update of this month's Progress Schedule is still in process.

^{2.} See "Notable Variances" for explanation on date shift.

Completion of Segment 4 has been delayed from March 25, 2021 to June 30, 2021 due to delays in the delivery of switchgear equipment required to complete the Traction Power Substation 2 (TPS-2) facility.

Table 7-2 Critical Path Summary

| Activity | Start | Finish |
|---|------------|------------|
| Manufacturing, Testing & Acceptance of Trainsets 1 - 14 | 08/13/2018 | 07/22/2022 |
| RSD w/out Risk Contingency | 05/06/2022 | 07/22/2022 |
| FFGA RSD w/ Risk Contingency | 08/22/2022 | 08/22/2022 |

Schedule Hold Points

Schedule Hold Points (SHP) represent key milestones on or near a schedule's critical path that are used as measurement points with respect to contingency drawdown. Delays to these key milestones have the potential to require a program to utilize available contingency. Table 7-3 below reflects the SHPs for the PCEP program schedule. The dates indicated reflect the planned completion dates for each SHP.

Table 7-3 Schedule Hold Points

| Schedule Hold Point (SHP) | Date |
|---|----------------|
| FTA/PMOC Risk Refresh | 08/30/2016 (A) |
| Begin EMU Manufacturing | 12/04/2017 (A) |
| Arrival of 1 st Trainset in Salt Lake City | 02/04/2019 (A) |
| Arrival of 1 st Trainset in Pueblo, CO | 11/25/2020 |
| Arrival of 1st Trainset at JPB | 04/30/2021 |
| Segment 4 Completion | 06/30/2021 |
| Conditional Acceptance of 1st Trainset | 12/17/2021 |
| System Electrified | 03/26/2022 |
| Begin Phased Revenue Service | 03/27/2022 |
| Conditional Acceptance of 14th Trainset | 07/22/2022 |
| FFGA RSD w/ Risk Contingency | 08/22/2022 |

Note: "(A)" denotes an actual completion

8.0 BUDGET AND EXPENDITURES

The summary of overall budget and expenditure status for the PCEP and Third-Party Improvements is shown in the following tables. Table 8-1 reflects the Electrification budget, Table 8-2 the EMU budget, Table 8-3 the overall PCEP budget, and Table 8-4 Third Party Improvements budget. Table 8-5 summarizes the budget transfers of contingency completed this month.

Table 8-1 Electrification Budget & Expenditure Status

| Description of Work | Budget | Current Budget | Cost This Month | Cost To Date | Estimate To Complete | Estimate At Completion | |
|------------------------------|-----------------|-------------------|--------------------|------------------|-------------------------|---------------------------|--|
| | (A) | (B) ¹ | (C) ² | (D) ³ | (E) | (F) = (D) + (E) | |
| ELECTRIFICATION | ELECTRIFICATION | | | | | | |
| Electrification (4) | \$696,610,558 | \$730,608,142 | \$4,897,572 | \$416,621,876 | \$313,986,266 | \$730,608,142 | |

| Experience | \$43,000 | \$43,000 | \$0 | \$0 | \$43,000 | \$43,000 |
| CNPA TOTAL | \$176,495,397 | \$176,495,397 | \$0 | \$57,369,012 | \$119,068,091 | \$176,437,103 |

- ^{1.} Column B "Current Budget" includes executed change orders and awarded contracts.
- ^{2.} Column C "Cost This Month" represents the cost of work paid this month.
- 3. Column D "Cost To Date" includes actuals (amount paid) to date.

Table 8-4 shows improvements outside of the scope of PCEP that are funded with non-PCEP funds. These improvements are implemented through the PCEP contracts. In FTA terminology, these efforts are categorized as Concurrent Non-Project Activities (CNPA).

- CHSRA Early Pole Relocation: Relocation of 196 OCS poles as part of PCEP. Implementing these pole relocations minimizes future cost and construction impacts. This scope is funded by the CHSRA.
- PS-3 Relocation (Design): Relocate PS-3 (Burlingame) as part of PCEP to avoid a future conflict with the Broadway Grade Separation Project (BGSP). This scope is funded by the BGSP.
- PS-3 Relocation (FEMA, BGSP Design Coord.): PS-3 Relocation FEMA Update and Design Coordination: Perform incremental design effort related to the 2019 FEMA requirement update to the flood plain map and design coordination with the BGSP. This scope is funded by the BGSP.
- TPSS-2 VTA/PCEP Pole Relocation and Height (Design): Design changes due to the relocation of VTA/BART Pole at TPSS-2 location and pole height redesign for live line clearances. This scope is funded by the VTA.
- EMU Option Cars: Exercise Stadler Contract Option for 37 additional EMUs. This scope is funded with a combination of TIRCP and matching local funds.
- Add Flip-Up Seats into Bike Cars: Stadler contract change order to add four additional flip-up seats in each of the two unpowered (bike) cars per trainset (eight total per trainset). This scope is funded by Caltrain outside of the PCEP.
- Update Virtual Reality Experience: Stadler contract change order to update the virtual reality experience to reflect the latest configuration of the trainsets. This scope is funded by Caltrain outside of the PCEP.

Table 8-5 Budget Transfers of Contingency

| Transfer | Description | Contingency ¹ | |
|------------------|--|--------------------------|--|
| ELECTRIFICATION | | | |
| BBI-053-CCO-063B | Track Access Delays – Quarter 1 2018 (Part 2) | \$92,906 | |
| BBI-053-CCO-106 | Track Access Delays – 2017 Quarter 4 | \$903,794 | |
| BT-009A | Performance Incentive Savings from Safety and Outreach in CY19 | (\$425,000) | |
| BT-013B | QA Support for FY21 H1 for Consolidated Engineering Labs, Inc. (CEL) | \$29,241 | |
| BT-031A | Agency Labor FY21 H1 Budget Transfer | \$2,528,552 | |
| | | | |
| | ELECTRIFICATION SUBTOTAL | \$3,129,493 | |
| EMU | | | |
| PROV-071-CCO-037 | Owner Supplied WSP Cabinet - Added Mechanical Pad and Conduit Pull | \$5,922 | |
| PROV-071-CCO-038 | Interior and Exterior Metal Wall Panels at CTR | \$10,317 | |
| PROV-071-CCO-039 | Exterior CMU Wall at CTR | \$16,152 | |
| PROV-071-CCO-040 | Membrane Waterproofing Specification Modifications | \$36,233 | |
| BT-031A | Agency Labor FY21 H1 Budget Transfer | \$365,306 | |
| | | | |
| | EMU SUBTOTAL | \$433,930 | |
| | DOED TOTAL | 4 | |
| | PCEP TOTAL | \$3,563,423 | |

Table 8-5 shows budget transfers of project contingency implemented during the current monthly reporting period. This table includes contingency transfers for both executed contract change orders as covered under Section 9.0 and uses of contingency for Program budget line items outside the five PCEP contracts.

Appendix D includes costs broken down by Standard Cost Code (SCC) format. This format is required for reporting of costs to the FTA. The overall project total in the SCC format is lower than the project costs in table 8-3. This is due to the exclusion of costs incurred prior to the project entering the Project Development phase.

^{1.} Budget amount transferred from project contingency. A negative amount represents a credit to contingency.

9.0 CHANGE MANAGEMENT

The change management process establishes a formal administrative work process associated with the initiation, documentation, coordination, review, approval and implementation of changes that occur during the design, construction or manufacturing of the PCEP. The change management process accounts for impacts of the changes and ensures prudent use of contingency.

Currently the PCEP contracts are BBII, CEMOF, Stadler, SCADA, Tunnel Modifications, and Amtrak.

A log of all executed change orders can be found in Appendix E.

Executed Contract Change Orders (CCO) This Month

Electrification Contract

Change Order Authority (5% of BBII Contract)

5% x \$696,610,558 = \$34,830,528

| Date | Change Number | Description | | CCO Amount |
|-----------|------------------|---|-------|------------|
| 8/3/2020 | BBI-053-CCO-063B | Track Access Delays – Quarter 1 2018 (Part 2) | | \$92,906 |
| 8/14/2020 | BBI-053-CCO-106 | Track Access Delays – 2017 Quarter 4 | | \$903,794 |
| | | | Total | \$996,700 |

^{1 (}When indicated) Change approved by the Board of Directors – not counted against the Executive Director's Change Order Authority.

EMU Contract

Change Order Authority (5% of Stadler Contract)

5% x \$550,899,459 = \$27,544,973

| Date | Change Number | Description | | CCO Amount |
|------|---------------|-------------|-------|------------|
| | None | | | \$0 |
| | | | Total | ¢0 |

¹ (When indicated) Change approved by the Board of Directors – not counted against the Executive Director's Change Order Authority.

SCADA Contract

Change Order Authority (15% of ARINC Contract)

15% x \$3,446,917 = \$517,038

| Date | Change Number | Description | | CCO Amount |
|------|---------------|-------------|-------|------------|
| | None | | | \$0 |
| | | | Total | \$0 |

^{1 (}When indicated) Change approved by the Board of Directors – not counted against the Executive Director's Change Order Authority.

Tunnel Modification Contract

Change Order Authority (10% of ProVen Contract)²

10% x \$38,477,777 = \$3,847,778

| Date | Change Number | Description | CCO Amount |
|------|---------------|-------------|------------|
| | None | | \$0 |

Total \$0

¹ (When indicated) Change approved by the Board of Directors – not counted against the Executive Director's Change Order Authority.

² Tunnel modification contract (\$38,477,777) includes: Notching (\$25,281,170) and Drainage (\$13,196,607). ³ Third Party Improvements/CNPA Projects that are funded with non-PCEP funds.

Monthly Progress Report

CEMOF Contract

Change Order Authority (10% of ProVen Contract)

10% x \$6,550,777 = \$655,078

| Date | Change Number | Description | CCO Amount |

Notes:

^{1.} When the threshold of 75% is reached, staff may return to the Board to request additional authority.

10.0 FUNDING

Figure 10-1 depicts a summary of the funding plan for the PCEP. It provides a breakdown of the funding partners as well as the allocated funds. As previously noted, FTA awarded \$97 million in Section 5307 funding for the project. During the past month, FTA awarded the next \$100 million in Core Capacity funding for the project.

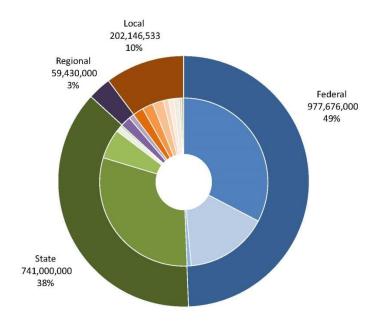

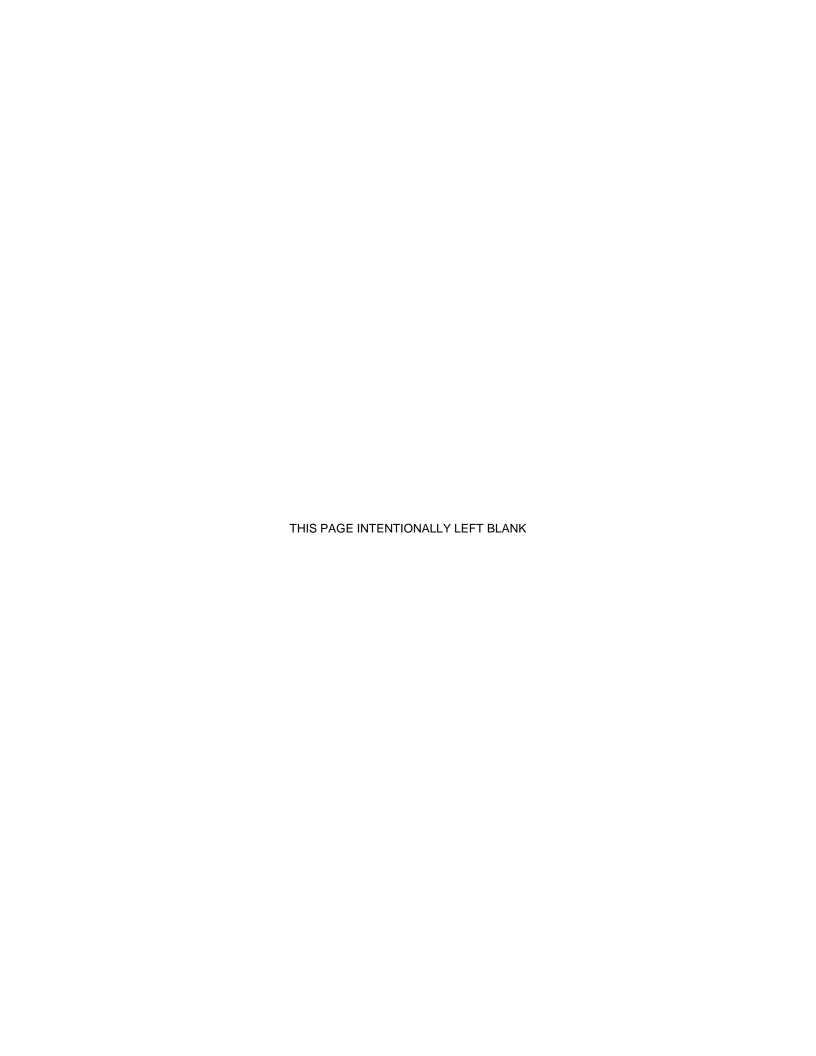

Figure 10-1 Funding Plan

Notes:

^{*}Includes necessary fund transfer with SMCTA

^{**}Includes \$4M CMAQ Transfer considered part of SF local contribution

11.0 RISK MANAGEMENT

The risk management process is conducted in an iterative fashion throughout the life of the project. During this process, new risks are identified, other risks are resolved or managed, and potential impacts and severity modified based on the current situation. The Risk Management team's progress report includes a summary on the effectiveness of the Risk Management Plan, any unanticipated effects, and any correction needed to handle the risk appropriately.

The Risk Management team meets monthly to identify risks and corresponding mitigation measures. Each risk is graded based on the potential cost and schedule impacts they could have on the project. This collection of risks has the greatest potential to affect the outcome of the project and consequently is monitored most closely. For each of the noted risks, as well as for all risks on the risk register, mitigation measures have been identified and are being implemented. Progress in mitigating these risks is confirmed at monthly risk assessment meetings attended by project team management and through continuous monitoring of the Risk Management Lead.

The team has identified the following items as top risks for the project (see Appendix F for the complete Risk Table):

- 1. The contractor may not complete and install signal design including two-speed check (2SC) modifications within budget and schedule.
- 2. Extent of differing site conditions and associated redesign efforts results in delays to the completion of the electrification contract and increases program costs.
- 3. Sub-optimal contractor sequencing, when progressing design and clearing foundation locations may result in construction inefficiencies.
- 4. Property acquisition not complete per contractor availability date.
- 5. Additional property acquisition is necessitated by change in design.
- 6. TASI may not have sufficient number of signal maintainers for testing.
- 7. Contractor generates hazardous materials that necessitate proper removal and disposal in excess of contract allowances and expectations.
- 8. Collaboration across multiple disciplines to develop a customized rail activation program may fail to comprehensively address the full scope of issues required to operate and maintain an electrified railroad and decommission the current diesel fleet.

Activity This Month

- Updated risk descriptions, effects, and mitigations based upon weekly input from risk owners. Monthly cycle of risk updating was completed based on schedules established in the Risk Identification and Mitigation Plan.
- Updated risk retirement dates based upon revisions to the project schedule and input from risk owners.
- Continued weekly monitoring of risk mitigation actions and publishing of the risk register.
- Continued monitoring of issues on issues log for determination of new risks.

Monthly Progress Report

 The Risk Management team attended Project Delivery, Vehicle Design, and Systems Integration meetings to monitor developments associated with risks and to identify new risks.

Figures 11-1 and 11-2 show the risks identified for the program. Risks are categorized as top risk, upcoming risk, and all other risks. The categories are based on a rating scale composed of schedule and cost factors. Top risks are considered to have a significantly higher than average risk grade. Upcoming risks are risks for which mitigating action must be taken within 60 days. All other risks are risks not falling into other categories.

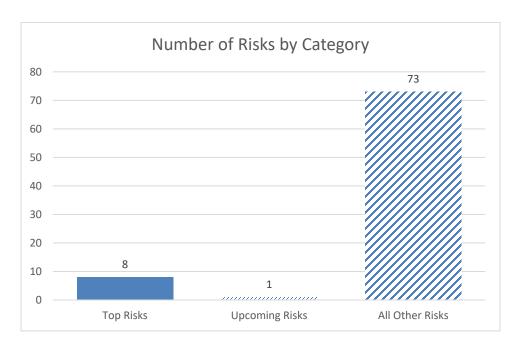

Figure 11-1 Monthly Status of Risks

Total Number of Active Risks = 82

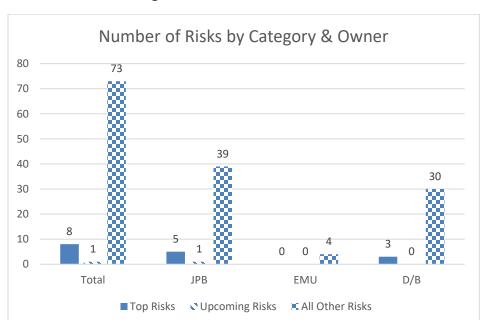

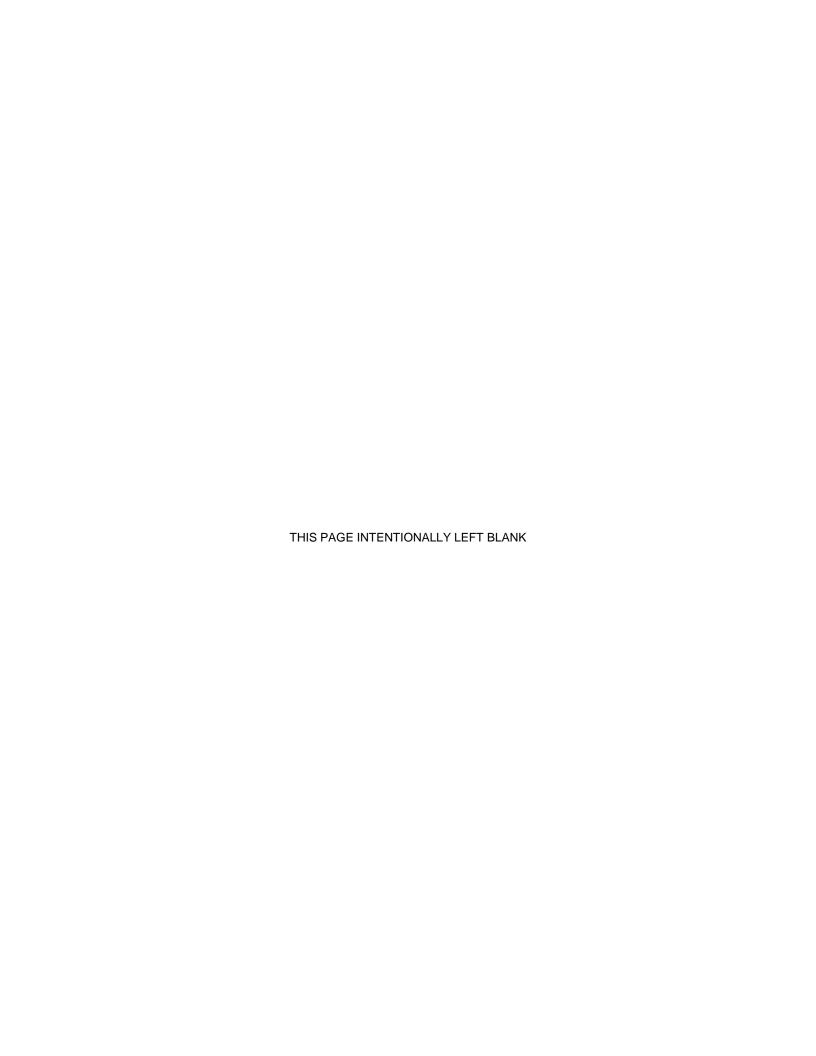

Figure 11-2 Risk Classification

Total Number of Active Risks = 82

- Conduct weekly monitoring of risk mitigation actions and continue publishing risk register.
- Update risk descriptions, effects, mitigations and retirement dates based on weekly monitoring and attendance at key project meetings.
- Monitor issues on issues log for determination of potential new risks.
- Convene Risk Assessment Committee meeting.

12.0 ENVIRONMENTAL

12.1. Permits

The PCEP has obtained the required environmental permits from the following agencies/federal regulations: Section 106 of the National Historic Preservation Act of 1966 (NHPA), Section 7 of the Endangered Species Act (ESA), United States Army Corps of Engineers, San Francisco Bay Regional Water Quality Control Board (SFWQCB), the California Department of Fish and Wildlife, and the San Francisco Bay Conservation Development Commission.

Activity This Month

None

Activity Next Month

None

12.2. Mitigation Monitoring and Reporting Program (MMRP)

The California Environmental Quality Act (CEQA) requires that a Lead Agency establish a program to monitor and report on mitigation measures that it has adopted as part of the environmental review process. The PCEP team has prepared a MMRP to ensure that mitigation measures identified in the PCEP Environmental Impact Report are fully implemented during project implementation. PCEP will implement the mitigation measures through its own actions, those of the DB contractor and actions taken in cooperation with other agencies and entities. The status of each mitigation measure in the MMRP is included in Appendix G.

Activity This Month

- Environmental compliance monitors were present during project activities (OCS pole foundation installation, potholing for utility location, grading, tree trimming/removal, conduit installation, abandoned signal cable removal, installing snow fence at PS-1, etc.) occurring in areas that required environmental compliance monitoring. The monitoring was conducted in accordance with measures in the MMRP in an effort to minimize potential impacts on sensitive environmental resources.
- Noise and vibration monitoring also occurred during project activities, and nonhazardous soil was removed from the right of way (ROW).
- Environmentally Sensitive Area (ESA) delineation (staking and/or fencing)
 occurred to delineate jurisdictional waterways and other potentially sensitive areas
 that should be avoided during upcoming construction activities. Pre-construction
 nesting bird surveys during the nesting bird season continued (nesting bird season
 is defined as February 1 through September 15), and pre-construction surveys for
 sensitive avian species continued at previously identified potential habitat
 locations. Wildlife exclusion fencing installation and monitoring occurred adjacent
 to portions of the alignment designated for wildlife exclusion fencing.
- Best management practices (BMPs) installation and maintenance (e.g., silt fencing, straw wattles with no monofilament netting per wildlife agency permit

Monthly Progress Report

- requirements, soil covers, etc.) occurred at equipment staging areas and other work areas throughout the alignment in accordance with the project-specific Stormwater Pollution Prevention Plan (SWPPP).
- Coordination with California Department of Fish and Wildlife (CDFW) regarding the
 observation of a western burrowing owl burrow adjacent to the ROW, near the San
 Jose Airport. The CDFW approved the reduction of the disturbance buffer from 200
 meters to 75 meters, now that the burrowing owl breeding season has ended
 (breeding season ended September 1).

- Environmental compliance monitors will continue to monitor project activities (OCS pole foundation installation, pot holing for utility location, tree trimming/removal, conduit installation, abandoned signal cable removal, permanent fence installation, fiber optic cable installation, etc.) occurring in areas that require environmental compliance monitoring in an effort to minimize potential impacts on sensitive environmental resources in accordance with the MMRP.
- Noise and vibration monitoring of project activities will continue to occur and nonhazardous soil will continue to be removed.
- Biological surveyors will continue to conduct pre-construction surveys for sensitive
 wildlife species ahead of project activities. Pre-construction nesting bird surveys
 during the nesting bird season will continue (nesting bird season is defined as
 February 1 through September 15).
- BMPs installation will continue in accordance with the project-specific SWPPP, and ESA staking and fencing will continue to occur, to delineate jurisdictional waterways, and other potentially sensitive areas, that should be avoided during upcoming project activities.
- Wildlife exclusion fencing will continue to be installed and maintained prior to upcoming construction activities adjacent to potentially suitable habitat for sensitive wildlife species.

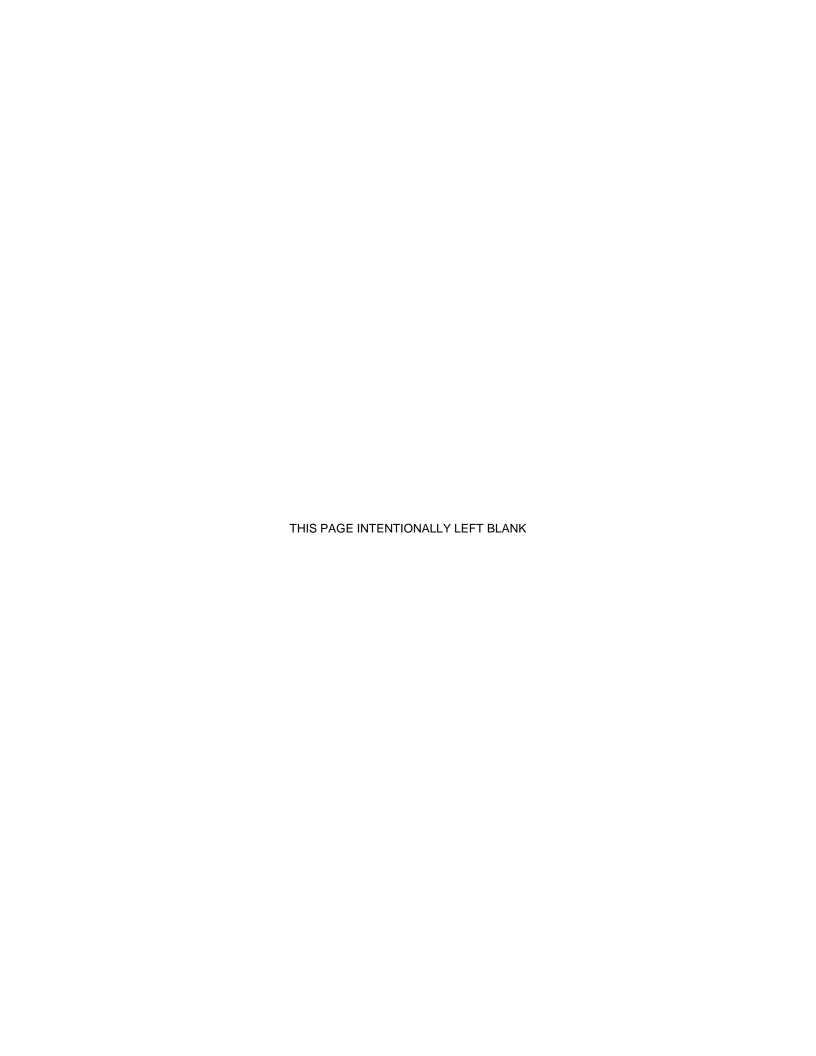

13.0 UTILITY RELOCATION

Implementation of the PCEP requires relocation or rerouting of both public and private utility lines and/or facilities. Utility relocation will require coordination with many entities, including regulatory agencies, public safety agencies, federal, state, and local government agencies, private and public utilities, and other transportation agencies and companies. This section describes the progress specific to the utility relocation process.

Activity This Month

- Worked with all utilities on review of overhead utility line relocations based on the current design.
- Coordinated with individual utility companies on relocation plans and schedule for incorporation with Master Program Schedule.
- Coordinated work with communications utilities on review of relocation design and prioritization of relocations.
- All relocations required by SVP in Segment 3 are complete.
- Continued to coordinate relocation work for Palo Alto Power facilities. Palo Alto's schedule completion of utility relocations have slipped to October 2020. Any temporary shutdowns required by PCEP prior to that date will be coordinated with Palo Alto.
- Continued to coordinate relocation by communication cable owners such as AT&T and Comcast.
- Conducted utility coordination meeting to discuss overall status and areas of potential concern from the utilities.

- Coordinate with individual utility owners on the next steps of relocations, including support of any required design information.
- Update the relocation schedule as information becomes available from the utility owners.
- Continue to review relocation design from Palo Alto Power, and communications companies and coordinate relocation field work.
- Continue communication relocations in all Segments.
- Review SSWPs by Palo Alto Power for relocation work in Segment 3. Continue Palo Alto Power relocations in Segment 3.

14.0 REAL ESTATE

The PCEP requires the acquisition of a limited amount of real estate. In general, Caltrain uses existing Right of Way (ROW) for the PCEP, but in certain locations, will need to acquire small portions of additional real estate to expand the ROW to accommodate installation of OCS supports (fee acquisitions or railroad easements) and associated Electrical Safety Zones (ESZ) (easements). There are two larger full acquisition areas required for wayside facilitates. The PCEP Real Estate team manages the acquisition of all property rights. Caltrain does not need to acquire real estate to complete the EMU procurement portion of the PCEP.

Of the parcels identified at the beginning of the project, there remain only five owners from whom the agency requires possession.

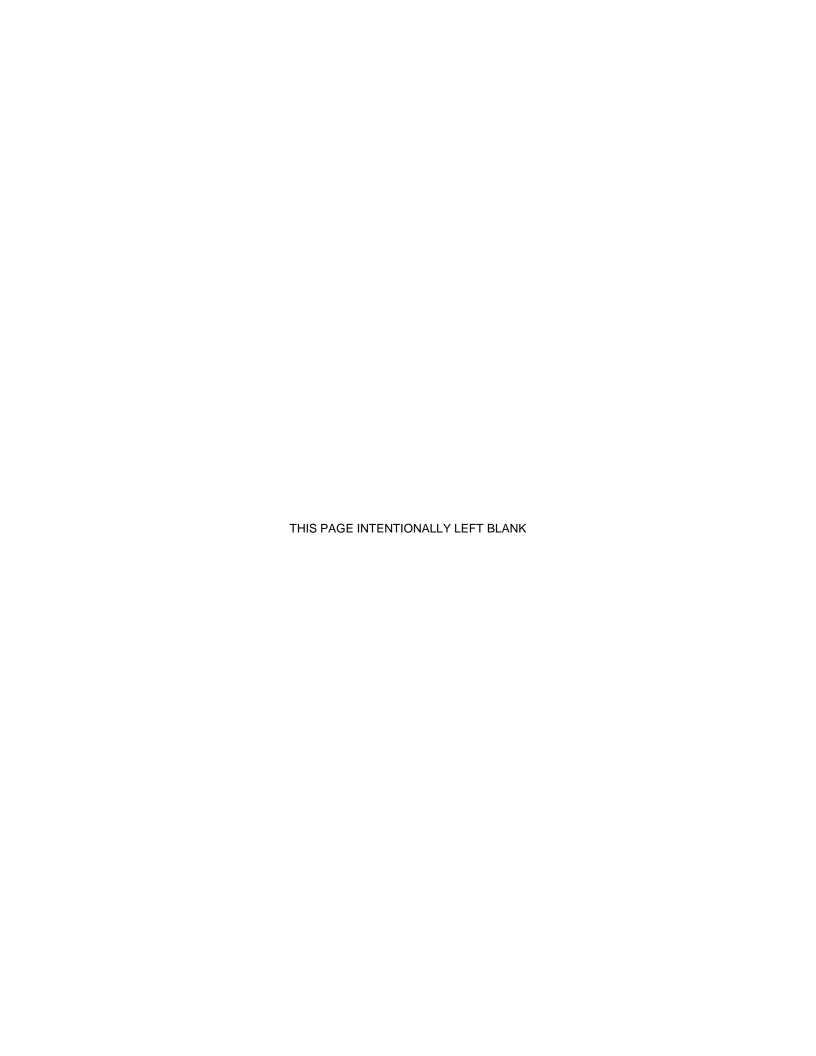

The Real Estate team's current focus is working to identify new parcels and acquire them in conjunction with the project schedule.

- Staff has defined a process to ensure that BBII conveys new property needs (both for poles and for overhead wires) as soon as possible.
 - BBII must justify and JPB must approve all new parcels.
- Design needs to progress to enable BBII to identify exact acquisition areas.
- Staff is conducting pre-acquisition activities as appropriate.
- JPB has approved eight new parcels to date.

Activity This Month

- Staff continues to review potential new pole locations and is engaging in a systemwide review of potential ESZ needs Staff continues to meet with the internal signal team and BBII signal team to determine potential Real Estate interests.
- The project is building a fence and moving light poles on the PG&E Cinnabar property to clear foundation locations. Staff has negotiated access with PGE pending completion of the fence and lighting work and drafted legal documents for possession.

- Continued review of ESZ needs submitted by BBII compared to direction from contract.
- Continue to work with property owner on Phan parcel to close escrow.
- Complete Marchese appraisal.
- File "friendly" condemnation action to get possession of PG&E Cinnabar site.
- Continue to meet with internal signal team and BBII signal team to determine potential Real Estate needs.
- Make offers on the parcel for which appraisals have been completed.
- Continue to work with project team to identify and analyze new potential parcels.
- Map newly identified parcels.

15.0 THIRD PARTY AGREEMENTS

Third-party coordination is necessary for work impacting public infrastructure, utilities, ROW acquisitions, and others. Table 15-1 below outlines the status of necessary agreements for the PCEP.

Table 15-1 Third-Party Agreement Status

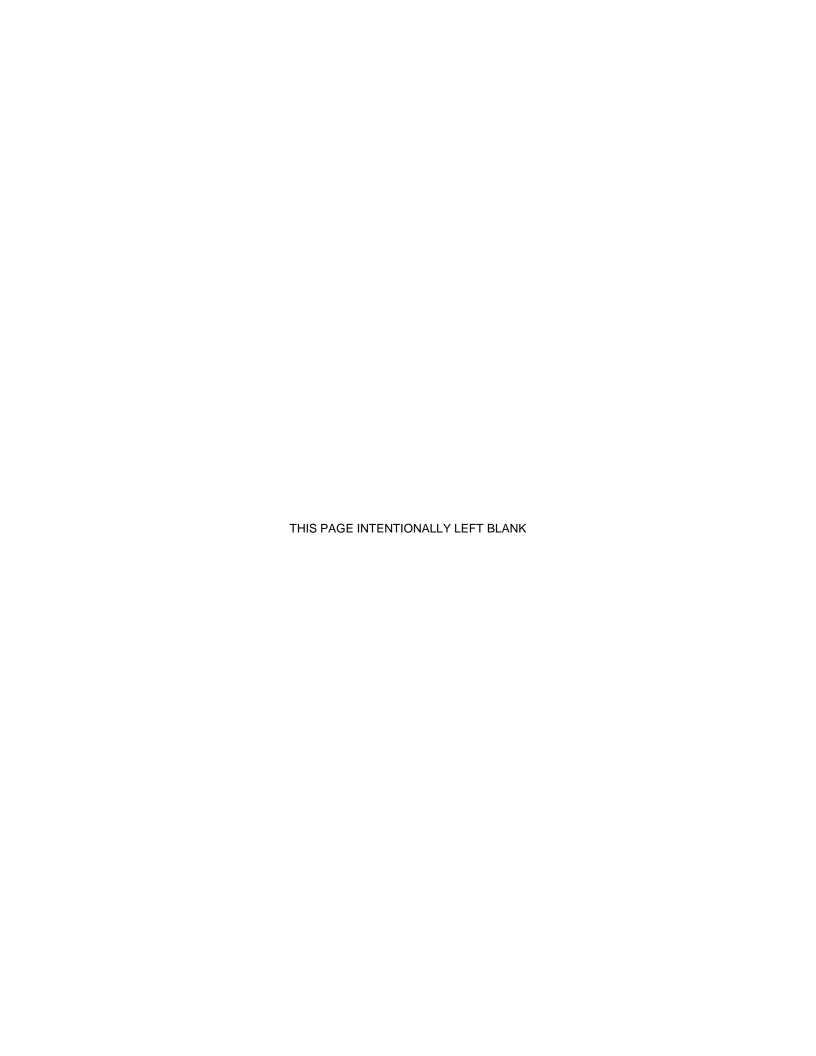

| Туре | Agreement | Third-Party | Status |
|----------------|------------------------------|---|-------------------------|
| | | City & County of San Francisco | Executed |
| | | City of Brisbane | Executed |
| | | City of South San Francisco | Executed |
| | | City of San Bruno | Executed |
| | | City of Millbrae | Executed |
| | | City of Burlingame | Executed |
| | | City of San Mateo | Executed |
| | | City of Belmont | Executed |
| | | City of San Carlos | Executed |
| | Construction & Maintenance 1 | City of Redwood City | Executed |
| Governmental | maintenance | City of Atherton | In Process |
| Jurisdictions | | County of San Mateo | Executed |
| | | City of Menlo Park | Executed |
| | | City of Palo Alto | Executed |
| | | City of Mountain View | Executed |
| | | City of Sunnyvale | Executed |
| | | City of Santa Clara | Executed |
| | | County of Santa Clara | Executed |
| | | City of San Jose | Executed |
| | | San Francisco | In Process |
| | Condemnation Authority | San Mateo | Executed |
| | | Santa Clara | Executed |
| Utilities | Infrastructure | PG&E | Executed |
| Ountes | Operating Rules | CPUC | Executed |
| | Construction & Maintenance | Bay Area Rapid Transit | Executed ² |
| Transportation | Construction & Maintenance | California Dept. of Transportation (Caltrans) | Not needed ³ |
| & Railroad | Trackage Rights | UPRR | Executed ² |

Notes regarding table above:

^{1.} Agreements memorialize the parties' consultation and cooperation, designate respective rights and obligations and ensure cooperation between the JPB and the 17 cities and three counties along the Caltrain ROW and within the PCEP limits in connection with the designand construction of the PCEP.

^{2.} Utilizing existing agreements.

^{3.} Caltrans Peer Process utilized. Formal agreement not needed.

16.0 GOVERNMENT AND COMMUNITY AFFAIRS

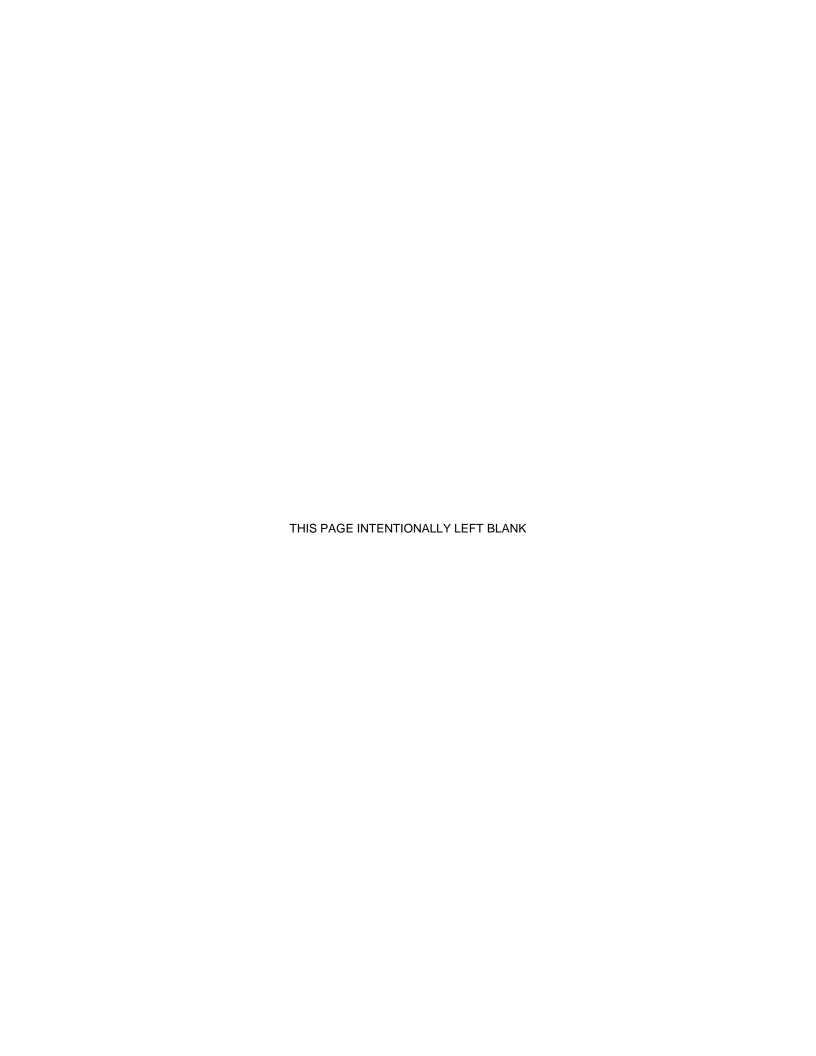

The Community Relations and Outreach team coordinates all issues with all jurisdictions, partner agencies, government organizations, businesses, labor organizations, local agencies, residents, community members, other interested parties, and the media. In addition, the team oversees the BBII's effectiveness in implementing its Public Involvement Program. The following PCEP-related external affairs meetings took place this month:

Presentations/Meetings

- City/County Staff Coordinating Group
- Local Policy Makers Group
- Redwood City Chamber of Commerce

Third Party/Stakeholder Actions

None

17.0 DISADVANTAGED BUSINESS ENTERPRISE (DBE) PARTICIPATION AND LABOR STATISTICS

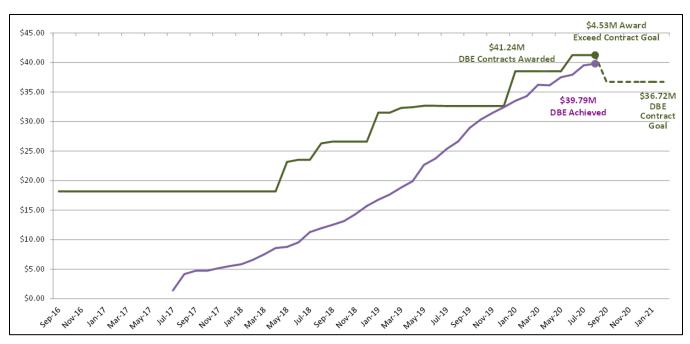

BBII proposed that 5.2% (\$36,716,397) of the DB base contract value including DBE contract change orders (\$706,084,567) would be subcontracted to DBEs.

Activity This Month

As expressed in Figure 17-1 below, to date BBII reports:

- \$39,789,779 has been paid to DBE subcontractors.
- \$41,242,326 million of DBE contracts have been awarded (to be verified).
- 5.64% has been achieved.

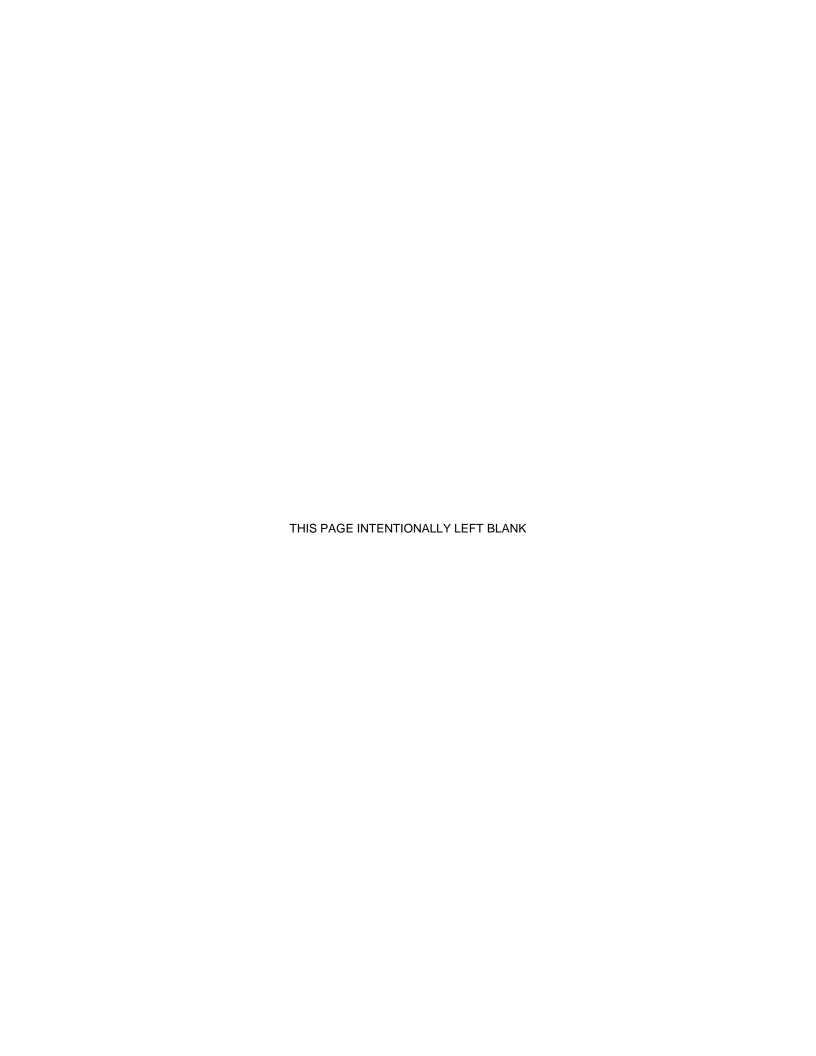

Figure 17-1 DBE Participation

Activity Next Month

BBII has proposed the following key actions:

"In the month of September, 2020, we continue to anticipate increasing our DBE commitments to firms who we are currently negotiating pricing on proposed work or Professional Services Agreements. We are optimistic about the prospect of making future awards to DBE firms. We also anticipate that the existing project work will increase resulting in expanded work for current DBE subcontractors."

18.0 PROCUREMENT

Invitation for Bids (IFB)/Request for Quotes (RFQ)/ Request for Proposals (RFP) Issued this Month:

None

Bids, Quotes, Proposals in Response to IFB/RFQ/RFP Received this Month:

None

Contract Awards this Month:

None

Work Directive (WD)/Purchase Order (PO) Awards & Amendments this Month:

Multiple WDs & POs issued to support the program needs

In Process IFB/RFQ/RFP/Contract Amendments:

RFQ – Scissor Lift Work Platform

Upcoming Contract Awards/Contract Amendments:

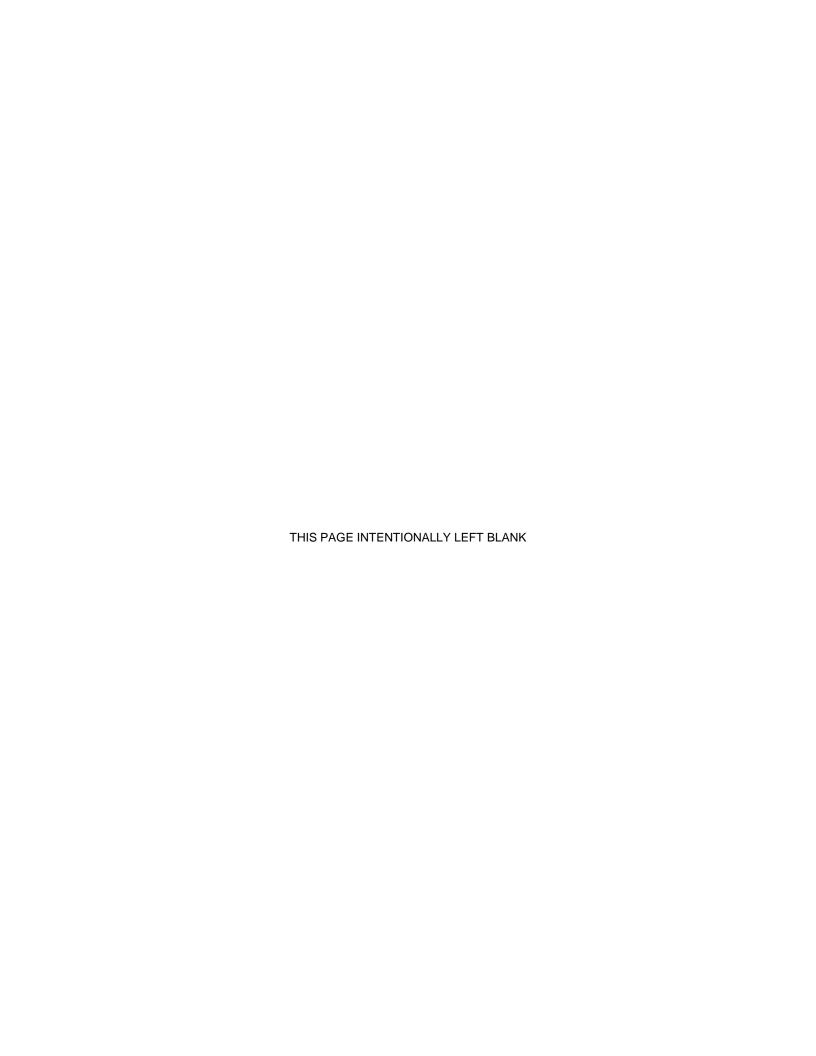

None

Upcoming IFB/RFQ/RFP to be Issued:

None

Existing Contracts Amendments Issued:

None

19.0 TIMELINE OF MAJOR PROJECT ACCOMPLISHMENTS

Below is a timeline showing major project accomplishments from 2001 to 2017:

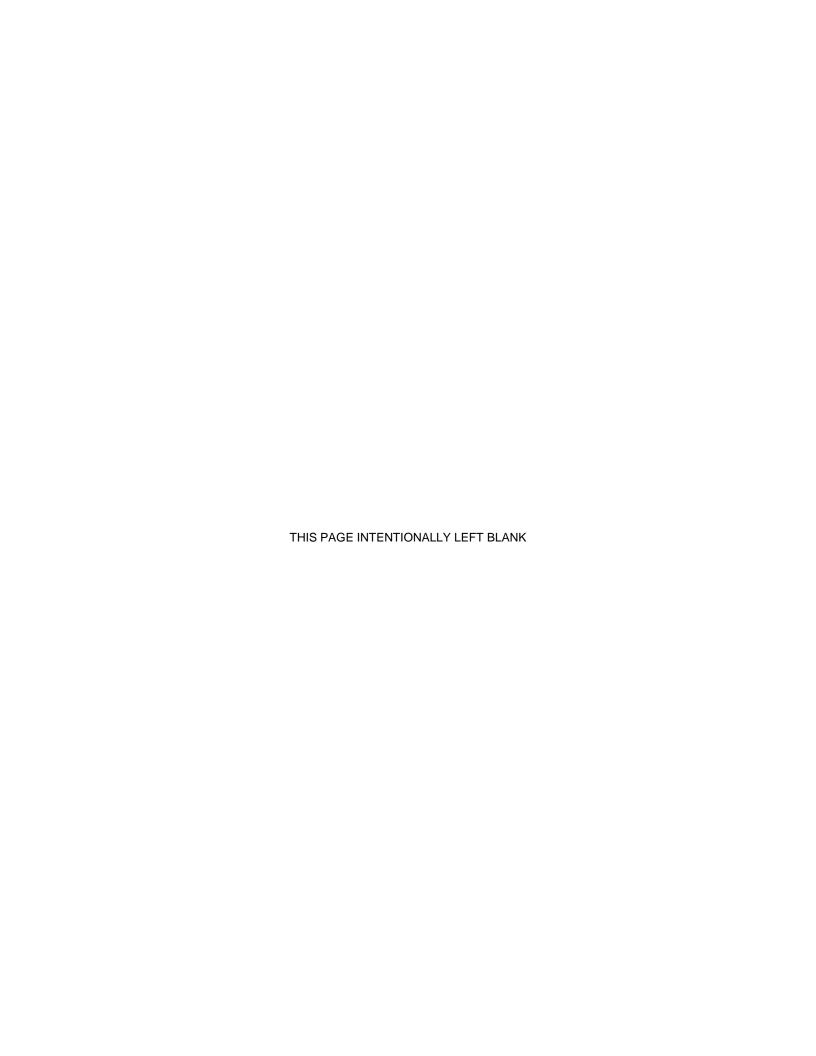

| Date 2001 | Milestone Began federal National Environmental Policy Act (NEPA) Environmental Assessment (EA) / state EIR clearance process |
|------------------|--|
| 2002 | Conceptual Design completed |
| 2004 | Draft NEPA EA/EIR |
| 2008 | 35% design complete |
| 2009 | Final NEPA EA/EIR and Finding of No Significant Impact (FONSI) |
| 2014 | RFQ for electrification RFI for EMU |
| 2015 | JPB approves final CEQA EIR JPB approves issuance of RFP for electrification JPB approves issuance of RFP for EMU Receipt of proposal for electrification FTA approval of Core Capacity Project Development |
| 2016 | JPB approves EIR Addendum #1: PS-7 FTA re-evaluation of 2009 FONSI Receipt of electrification best and final offers Receipt of EMU proposal Application for entry to engineering to FTA Completed the EMU Buy America Pre-Award Audit and Certification Negotiations completed with Stadler for EMU vehicles Negotiations completed with BBII, the apparent best-value electrification firm JPB approves contract award (LNTP) to BBII JPB approves contract award (LNTP) to Stadler FTA approval of entry into engineering for the Core Capacity Program Application for FFGA |
| 2017 | FTA finalized the FFGA for \$647 million in Core Capacity funding, met all regulatory requirements including end of Congressional Review Period (February) FTA FFGA executed, committing \$647 million to the project (May) JPB approves \$1.98 billion budget for PCEP (June) Issued NTP for EMUs to Stadler (June 1) Issued NTP for electrification contract to BBII (June 19) Construction began (August) EMU manufacturing began (October) Issued NTP for SCADA to Rockwell Collins (ARINC) (October) Issued NTP for CEMOF Facility Upgrades to HNTB (November) |

| Date | Milestone |
|------|---|
| 2018 | Completed all PG&E agreements |
| | JPB approves contract award to Mitsui for the purchase of electric locomotives and Amtrak for overhaul services, storage, acceptance testing, training, and shipment of locomotive to CEMOF |
| | JPB approves authorization for the Executive Director to negotiate final contract award to ProVen for tunnel modifications and track rehabilitation project |
| | JPB approves contract award (LNTP) to ProVen for tunnel modifications |
| | Issued NTP to ProVen for tunnel modifications (October) |
| | Amended contract with ProVen to include OCS in the tunnels (November) |
| 2019 | JPB approves contract award to ProVen for CEMOF modifications (February) |
| | JPB approves LNTP to ProVen for CEMOF modifications (April) |
| | JPB approves NTP to ProVen for CEMOF modifications (September) |
| 2020 | JPB approves agreement amendment to PG&E for interconnection construction |
| | JPB executes agreement with PG&E for interconnection construction (May) |
| | FRA approved the waiver for Alternative Vehicle Technology regarding crashworthiness of EMU cars. |

Appendix F – Risk Table

Listing of PCEP Risks and Effects in Order of Severity

| ID | RISK DESCRIPTION | EFFECT(S) | | | |
|-----|--|---|--|--|--|
| 314 | The contractor may not complete and install signal design including Two-speed check (2SC) modifications within budget and schedule. | Delay and additional cost for rework. | | | |
| 303 | Extent of differing site conditions and associated redesign efforts results in delays to the completion of the electrification contract and increases program costs. | Extends construction of design-build contract with associated increase in project costs • DSC design cost • Inefficiencies • Construction costs related to DSCs (i.e., larger foundations) • Additional potholing | | | |
| 313 | Sub-optimal contractor sequencing, when progressing design and clearing foundation locations may result in construction inefficiencies | Contractor claims for increase in construction and design costs, and reduced production rates extending construction duration | | | |
| 240 | Property not acquired in time for contractor to do work. Property Acquisition not complete per contractor availability date <> Fee <> Easement <> Contract stipulates that if parcels are not available by contract date, there is only a delay if parcels are not available by the time contractor completes the Segment | Potential delays in construction schedule | | | |
| 267 | Additional property acquisition is necessitated by change in design. | New project costs and delays to schedule. | | | |
| 010 | Potential for Stadler's sub-suppliers to fall behind schedule or delays in parts supply chain result in late completion of vehicles. | Delay in obtaining parts / components. Cost increases. (See Owner for allocation of costs) Schedule increase - 3 months (See Owner for allocation of damages associated with this Risk) | | | |
| 209 | TASI may not have sufficient number of signal maintainers for testing. | Delays to construction/testing. Delays to completion of infrastructure may delay acceptance of vehicles | | | |
| 308 | Rejection of DVR for ATF and static wires results in cost and schedule impacts to PCEP. | Delay and delay claims | | | |

| ID | RISK DESCRIPTION | EFFECT(S) | | |
|-----|--|--|--|--|
| | | Delay to construction while removing | | |
| | Contractor generates hazardous | and disposing of hazardous materials | | |
| 273 | materials, that necessitates proper removal and disposal in excess of | resulting in schedule delay, increased | | |
| | contract allowances and expectations. | construction costs, and schedule delay | | |
| | · | costs. | | |
| | Collaboration across multiple disciplines | | | |
| | to develop a customized rail activation program may fail to comprehensively | Delay in testing of EMUs. Delay in | | |
| 263 | address the full scope of issues | Revenue Service Date. Additional | | |
| 200 | required to operate and maintain an | costs for Stadler and BBII due to | | |

| | BBII needs to complete traction power | , | | |
| 322 | substations to be sufficiently complete | Delay in testing and increased costs | | |
| | to accept interim power | | | |
| | EMU production delay. Possible that | | | |
| 325 | there are quality issues, failed factory | Schedule Increase | | |
| | tests, poor integration / control of suppliers. | | | |
| | EMU production delay. Possible that | | | |
| 327 | there is poor integration / control of | Schedule Increase | | |
| | suppliers. | | | |

| ID | RISK DESCRIPTION | EFFECT(S) | | |
|-----|---|---|--|--|
| | | Prolonged delay to resolve issues (up to 12 months) | | |
| 013 | Vehicle manufacturer could default. | Increase in legal expenses | | |
| | | Potential price increase to resolve contract issue | | |
| 067 | Relocation of overhead utilities must precede installation of catenary wire and connections to TPSs. Relocation work will be performed by others and may not be completed to meet BBII's construction schedule. | Delay in progress of catenary installation resulting in claims and schedule delay | | |
| 223 | Major program elements may not be successfully integrated with existing operations and infrastructure in advance of revenue service. | Proposed changes resulting from electrification may not be fully and properly integrated into existing system. Rework resulting in cost increases and | | |
| 242 | Track access does not comply with contract-stipulated work windows. | schedule delays Contractor claims for delays, schedule delays and associated costs to owner's representative staff. | | |
| 253 | Permits for bridges may not be issued in a timely manner. | Delays to issuance of permit for construction while negotiating and executing an operation and maintenance agreement for equipment installed on bridges; existing bridge deficiencies could result in additional costs to PCEP. | | |
| 261 | Although EMUs meets their electromagnetic emissions limits and wayside signal system track circuits meet their susceptibility requirements there are still compatibility issues leading to improper signal system operation | Changes on the EMU and/or signal system require additional design and installation time and expense. | | |
| 285 | Potential for inflation, (except with respect to Maintenance Option) to increase contractor costs. | Higher cost | | |
| 286 | Potential for wage escalation, (except for Maintenance Option) to increase contractor costs. | Higher cost | | |
| 056 | Lack of operations personnel for testing. | Testing delayed.Change order for extended vehicle acceptance. | | |

| ID | RISK DESCRIPTION | EFFECT(S) |

| | requirements | |
| 272 | Final design based upon actual Geotech | Could require changes |
| | conditions | |

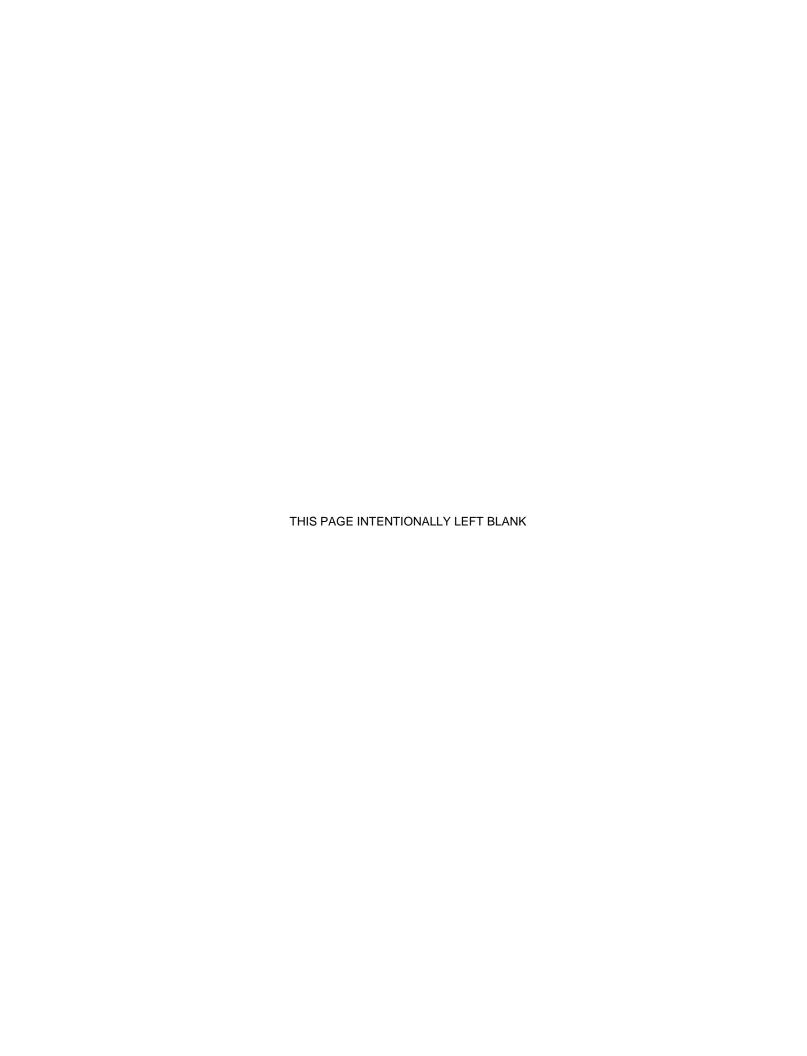

| ID | RISK DESCRIPTION | EFFECT(S) | | |
|-----|--|--|--|--|
| 287 | Design changes may necessitate additional implementation of environmental mitigations not previously budgeted. | Increased cost for environmental measures and delays to construct and overall delay in construction schedule | | |
| 289 | Coordination and delivery of permanent power for power drops for everything except traction power substations along alignment | Can't test resulting in delays to schedule and associated additional project costs. | | |
| 291 | Order/manufacture of long lead items prior to 100% IFC design document that proves to be incorrect | Design change and/or delays | | |
| 292 | Potential that UPS will not fit in the spaces allotted to communications work within the buildings. | Requisite backup capacity units under design criteria could result in the need for larger unit than originally planned resulting in design and fabrication changes and associated schedule delays and costs. | | |
| 304 | Solution to FRA concerns over bike storage impeding path to emergency exit windows path results in increased costs and potential rework. | Protracted negotiations with FRA to achieve original design | | |
| 317 | JPB may not make timely acquisition of resources to staff rail activation plan with key personnel. | Delay in operating electrified railroad - delay of RSD. | | |
| 323 | FRA concerns require re-design | | | |
| 326 | EMU production delay. Possible that there are failed factory tests | Schedule Increase | | |
| 027 | Vehicle power consumption may not meet requirements. <>System impact study and load flow show no issues | Issue with PG&E. Can't run full acceleration. | | |
| 031 | New cars possibly not reliable enough to be put into service as scheduled | Operating plan negatively impacted | | |
| 042 | Full complement of EMUs not available upon initiation of electrified revenue service | Late delivery impacts revenue service date. | | |
| 101 | PG&E may not be able to deliver permanent power for the project within the existing budget and in accordance with the project schedule | Additional project costs; potential delay to revenue service date | | |
| 150 | Number of OCS pole installation is significant. Any breakdown in sequencing of operations or coordination of multiple crews will have a substantial effect on the project. | Delay. | | |

| ID | RISK DESCRIPTION | EFFECT(S) | | |
|-----|---|---|--|--|
| 10 | Failure of BBI to submit quality design | | | |
| 245 | and technical submittals in accordance with contract requirements • \$3-\$5M/month burn rate for Owner's team during peak | Delays to project schedule and additional costs for preparation and review of submittals. | | |
| 252 | Failure of BBI to order/manufacture long lead items prior to 100% IFC design document approval by JPB | Delays to project schedule and additional cost for contractor and JPB staff time. | | |
| 271 | Need for additional construction easements beyond that which has been provided for Contractor proposed access and staging | Additional cost and time | | |
| 306 | Possible legal challenge and injunction to any changes in PCEP requiring subsequent CEQA or NEPA environmental clearance documentation/actions. | Worst case: a judge issues an injunction, which would prohibit any work ONLY on the project scope of the environmental document. Impact to the project from cost and schedule impact depends on if work is on the critical or becomes on the critical path. | | |
| 008 | Requests for change orders after vehicles are in production | Delays to manufacturing of vehicles and additional design and manufacturing costs. | | |
| 023 | Manufacturer cannot control vehicle weight to meet specifications. | Increased operating cost. | | |
| 025 | Potential that vehicles cannot meet requirements for "Mean Time to Repair" (MTTR). | Increased maintenance cost. | | |
| 032 | Failure to come up to speed on stakeholder safety requirements: <> FTA <> FRA <> CPUC | Takes longer than expected to gain FRA/FTA concurrence on waiver and/or level boarding requirements. | | |
| 053 | Failure to meet Buy America requirements. (Contractor definition of component v. sub-component may not be accepted by Caltrain / FTA.) | Potential need for negotiations that might lead to delay of project award. (BA is not negotiable) | | |
| 054 | Infrastructure not ready for vehicles (OCS, TPS, Commissioning site / facility). | Increases cost if done off property | | |
| 069 | Potential need for additional construction easements. Especially for access and laydown areas. Contractor could claim project is not constructible and needs more easements after award. | Increased cost Delay | | |

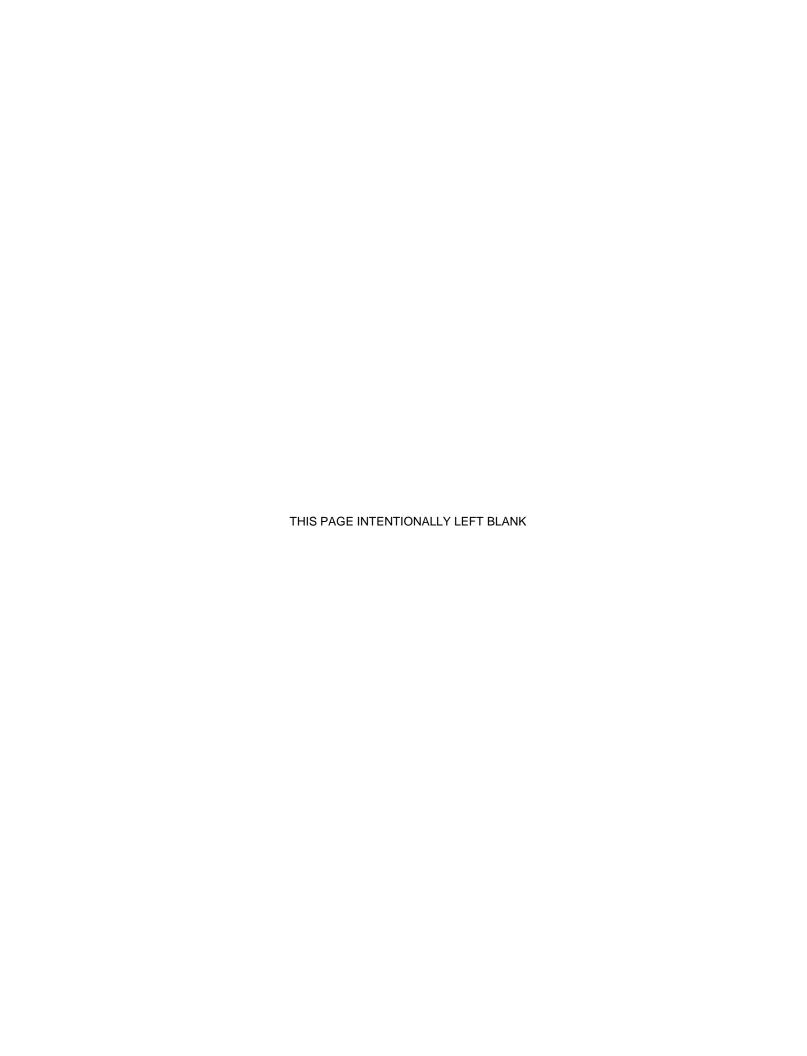

| ID | RISK DESCRIPTION | EFFECT(S) | | |
|-----|---|--|--|--|
| | Potential that DB contractor will have insufficient field resources (personnel or equipment) to maintain aggressive schedule. | | | |
| 106 | Multiple segments will need to be under design simultaneously. | | | |
| 106 | Labor pool issue. 32 qualified linemen will be needed. Potential there is not enough available. Big storm damage anywhere in US will draw from the pool to make line repairs. | Delay. | | |
| | Possible shortages with other specialty crafts as well. | | | |
| 151 | Public could raise negative concerns regarding wheel/rail noise. | Increased cost to mitigate: <> grind rails <> reprofile wheels <> sound walls | | |
| 161 | Unanticipated costs to provide alternate service (bus bridges, etc.) during rail service disruptions. | Cost increase. | | |
| 192 | Environmental compliance during construction. - Potential impact to advancing construction within the vicinity of any cultural finds that are excavated. - Failure to meet the commitments contained within the PCEP EA, FEIR and permit conditions | Delay Cost increase | | |
| 195 | Introduction of electrified train service will require training of first responders in working in and around the rail corridor. The new vehicles will be considerably quieter than the existing fleet and the presence of high voltage power lines will require new procedures for emergency response. A new training program will need to be developed and disseminated for: • Fire, police, and first responders • Local communities • Schools | Safety hazards resulting in incidents that delay construction and increase labor cost. Delays in RSD until training is completed as requirement of safety certification process. | | |

| ID | RISK DESCRIPTION | EFFECT(S) | | |
|-----|--|--|--|--|
| 237 | JPB needs an agreement with each city in which catenary will be strung over an existing grade crossing (17 in all) under GO 88 (grade crossings). These agreements must be executed subsequent to installing overhead catenary. JPB is preparing a response to CPUC while working with the cities. Delays in reaching agreement could have impacts on schedule and budget. | Not completing the grade crossing diagnostics and getting agreement from the cities on the results can result in delays to necessary approvals for the project and revenue service. | | |
| 248 | 3rd party coordination <>Jurisdictions, Utilities, UP, Contractors <>D/B needs to provide timely information to facilitate 3rd party coordination <>Risk is for construction | Delays in approvals resulting in project schedule delays and associated costs. | | |
| 250 | Potential for municipalities and other agencies to request betterments as part of the electrification project | Delay to project schedule in negotiating betterments as part of the construction within municipalities and associated increased cost to the project as no betterments were included in the project budget. | | |
| 254 | Potential that bridge clearance data are inaccurate and that clearances are not sufficient for installation of catenary. | Results in additional design and construction to create sufficient clearance. | | |
| 266 | Verizon poles in conflict with OCS may not be removed in advance of OCS installation. | Delay in progress of catenary installation resulting in claims and schedule delay | | |
| 274 | JPB as-built drawings and existing infrastructure to be used as basis of final design and construction is not correct | Additional cleanup of as-builts after PCEP construction | | |
| 275 | DB fails to verify as-built drawings and existing infrastructure | Additional cleanup of as-builts after PCEP construction | | |
| 278 | Failure of D/B contractor and subcontractors and suppliers to meet Buy America requirements | Delays while acceptable materials are procured and additional costs for delays and purchase of duplicative equipment. | | |
| 282 | Failure to maintain dynamic envelope and existing track clearances consistent with requirements. | Redesign entailing cost and schedule impacts. | | |
| 284 | Compliance with project labor agreement could result in inefficiencies in staffing of construction. | Increase in labor costs and less efficient construction resulting in schedule delays. | | |
| 290 | Delays in agreement and acceptance of initial VVSC requirements database. | Delay to design acceptance | | |
| 293 | Readiness of 115kV interconnect for temporary power to support testing | Delay in testing | | |

| ID | RISK DESCRIPTION | EFFECT(S) |
|-----|--|--|
| 311 | Although project recordable injuries remain below the industry average, there have been numerous small impact incidents occurring that could potentially lead to a more serious event occurring. | The occurrence of a high impact safety event could result in project rework, construction delays, and increased project costs. |

Mitigation Monitoring and Reporting

| Reporting | Miti | gatio | n Tim | ing | | |
|--|---------|--------------------------------------|-------|-----------|----------|---|
| Mitigation Measure | | Pre- Construction Construction | | Operation | Status | Status Notes |
| AES-2a: Minimize OCS construction activity on residential and park areas outside the Caltrain ROW. | x | x | | | Ongoing | The OCS proposed construction schedule has been provided to the JPB. OCS construction began the week of October 2, 2017. The D-B has utilized the potholing process to assist in locating conflicts in the 35% design and attempting to relocate OCS pole locations within the ROW. |
| AES-2b: Aesthetic treatments for OCS poles, TPFs in sensitive visual locations, and Overbridge Protection Barriers. | x | | | | Ongoing | The design requirements indicated in the measure have been implemented as described, and coordination with the specific jurisdictions regarding pole colors and design is ongoing. Coordination with the JPB & local jurisdiction regarding Overbridge Protection Barriers and TPFs is ongoing. |
| AES-4a: Minimize spillover light during nighttime construction. | <u></u> | X | | | Ongoing | OCS construction began the week of October 2, 2017; and the BBI community relations lead has notified nearby residents of upcoming construction. During construction, lighting is faced inward, towards the railroad tracks, and any complaints will be documented and addressed by the BBI community relations lead. |
| AES-4b: Minimize light spillover at TPFs. | X | | | | Upcoming | The design requirements indicated in the measure are being utilized in the design and construction process. |
| AQ-2a: Implement BAAQMD basic and additional construction mitigation measures to reduce construction- related dust. | X | Х | | | Ongoing | The Dust Mitigation Plan was submitted to the JPB and approved. The requirements in the Dust Mitigation Plan will be implemented throughout the construction period and documented in daily reports. |

Mitigation Monitoring and Reporting

| Reporting | | | | | | |
|---|---|---|---|-----------|----------|--|
| Mitigation Measure | | Pre- Construction Construction Post- Construction Operation | | | • | Status Notes |
| | | Pre- Construction Construction | | Operation | Status | |
| AQ-2b: Implement BAAQMD basic and additional construction mitigation measures to control construction- related ROG and NOX emissions. | x | x | | | Ongoing | The Equipment Emissions Control Plan was submitted to the JPB and approved. The requirements in the Equipment Emissions Control Plan will be implemented throughout the construction period and documented in daily reports. |
| AQ-2c: Utilize clean diesel- powered equipment during construction to control construction-related ROG and NOX emissions. | Х | Х | | | Ongoing | The Equipment Emissions Control Plan was submitted to the JPB and approved. The requirements in the Equipment Emissions Control Plan will be implemented throughout the construction period and documented in daily reports. |
| BIO-1a: Implement general biological impact avoidance measures. | X | Х | | | Ongoing | Worker Environmental Awareness Training is provided to all project- related personnel before they work on the project. All measures as described will be implemented throughout the construction period and documented in daily reports. |
| BIO-1b: Implement special- status plant species avoidance and revegetation measures. | X | X | Х | | Complete | Not applicable. Subsequent habitat assessment and avoidance of Communication Hill eliminated any potential to affect special-status plant species. The measure is not needed. |

Mitigation Monitoring and Reporting

| Reporting | Mitigation Timing | | | ing | | |
|---|----------------------|--------------|-----------------------|-----------|---------|---|
| Mitigation Measure | Pre- Construction | Construction | Post- Construction | Operation | Status | Status Notes |
| BIO-1c: Implement California red-legged frog and San Francisco garter snake avoidance measures. | x | x | | | Ongoing | Pre-construction surveys are occurring no more than 7 days prior to the initiation of construction activities nearby/adjacent to potential habitat for CRLF and SFGS. The Wildlife Exclusion Fencing Plans for Segments 1 and 4 were submitted and approved by the wildlife agencies, and installation and monitoring of wildlife exclusion fencing is ongoing. No CRLF / SFGS or sign of each species has been observed to date on the Project. |
| BIO-1d: Implement western pond turtle avoidance measures. | x | x | | | Ongoing | Pre-construction surveys are occurring no more than 7 days prior to the initiation of construction activities nearby/adjacent to potential habitat for WPT. No WPT or WPT sign have been observed to date on the Project. |
| BIO-1e: Implement Townsend's big-eared bat, pallid bat, hoary bat, and fringed myotis avoidance measures. | x | x | | | Ongoing | Pre-construction surveys are occurring no more than 7 days prior to the initiation of construction activities with the potential to disturb bats or their habitat. No special-status bats or sign have been observed to date on the Project. |
| BIO-1f: Implement western burrowing owl avoidance measures. | x | x | | | Ongoing | Protocol surveys for Western Burrowing Owl have been conducted from April–July, in 2017, 2018, and 2019, at previously identified potentially suitable habitat locations. Note that all of these locations are in Construction Segment 4 (southern Santa Clara and San Jose). No Burrowing Owls have been observed during the 2017-2019 surveys. Survey reports for the 2017, 2018, and 2019 surveys have been submitted to the JPB for the project |

Mitigation Monitoring and

Reporting

| Reporting | Mitigation Timing | | | | | |
|--------------------|-------------------|--------------|-----------------------|-----------|--------|---|
| Mitigation Measure | Pre- | Construction | Post- Construction | Operation | Status | Status Notes |
| | | | | | | record. In addition, pre-construction surveys of the potential BUOW habitat areas in Segment 4 are ongoing, as needed, and if required, they occur no more than 7 days prior to the onset of new ground-disturbing construction activities. Surveys for the 2020 breeding season will commenced in March 2020. On March 24, 2020, two burrowing owls were observed adjacent to the Caltrain ROW, near MP 44.6. The owls were located approximately 150 feet away from the Caltrain ROW. A 200-meter no-disturbance buffer continued to be implemented during the reporting period. Balfour was granted approval by the CDFW to drive vehicles and equipment through the buffer in order to access foundation installation locations to the North and South of the BUOW. During the first week of mobilization through the buffer, a Qualified Biological Monitor provided full-time biological monitoring to determine if the presence of vehicle travel had any impact on the BUOW. No impacts to the BUOW were observed, and the BUOW was consistently observed at the northern most potential BUOW burrow location during the monitoring effort. Due to the lack of observed impacts to the BUOW during the monitoring effort, the CDFW subsequently approved weekly spot-checks through the end of the breeding season, which are currently ongoing, and continued through August 31, 2020. No signs of distress from the |

| | Miti | gatio | n Tim | ing | | |
|--|----------------------|--------------|-----------------------|-----------|---------|---|
| Mitigation Measure | Pre- Construction | Construction | Post- Construction | Operation | Status | Status Notes |
| | | | | | | owl were observed due to construction activities during weekly spot checks. In addition, since there is some potential for indirect impacts during the non-breeding season (September 1 through January 31), during ongoing work on the Caltrain ROW and the completion of OCS pole foundations, the CDFW approved the reduction of the disturbance buffer from 200 meters down to 75 meters. The Qualified Biologist will monitor the burrows during construction activities within 75 meters of the burrows to look for any changes in owl foraging behavior in response to construction activities. If any change in owl nesting and foraging behavior is observed because of construction activities, activities will cease within the 75-meter buffer and the CDFW will be notified to determine next steps. |
| BIO-1g: Implement northern harrier, white- tailed kite, American peregrine falcon, saltmarsh common yellowthroat, purple martin, and other nesting bird avoidance measures. | X | x | | | Ongoing | Nesting Bird and raptor surveys were conducted from February 1 through September 15, in 2017, 2018 and 2019, prior to project-related activities with the potential to impact nesting birds. Nesting Bird Surveys recommenced on February 1, 2020 for the 2020 nesting season (February 1, 2020) and continued through this reporting period. During this reporting period, no nesting activity was observed. |

| Reporting | Miti | gatio | n Tim | ing | | |
|---|----------------------|--------------|-----------------------|-----------|----------|--|
| Mitigation Measure | Pre- Construction | Construction | Post- Construction | Operation | Status | Status Notes |
| BIO-1h: Conduct biological resource survey of future contractor-determined staging areas. | х | x | | | Ongoing | The agency-approved Qualified Biologist has conducted surveys of the staging areas currently being used for construction activities. No special-status species or other potentially sensitive biological resources were observed. The agency-approved Qualified Biologist will continue to survey ahead of the initiation of activities at planned staging areas as the Project moves into new construction areas. |
| BIO-1i: Minimize impacts on Monarch butterfly overwintering sites. | x | x | | | Ongoing | The agency-approved Qualified Biologist has periodically monitored the project limits to evaluate the presence of Monarch butterfly overwintering sites. No Monarch butterfly overwintering sites have been observed on the Project to date. |
| BIO-1j: Avoid nesting birds and bats during vegetation maintenance. | | | | x | Upcoming | To be completed during Project operation. |
| BIO-2: Implement serpentine bunchgrass avoidance and revegetation measures. | х | x | х | | Complete | Not applicable. Subsequent habitat assessment and avoidance of Communication Hill eliminated any potential to affect serpentine bunchgrass. This measure is no longer needed. |
| BIO-3: Avoid or compensate for impacts on wetlands and waters. | x | x | x | | Complete | The JPB has compensated for unavoidable wetland impacts by purchasing adequate credits from a wetlands mitigation bank approved by USACE and SFRWQCB. |

| Reporting | Miti | gatio | n Tim | ing | | |
|--|----------------------|--------------|-----------------------|-----------|----------|---|
| Mitigation Measure | Pre- Construction | Construction | Post- Construction | Operation | Status | Status Notes |
| BIO-5: Implement Tree Avoidance, Minimization, and Replacement Plan. | x | х | x | | Ongoing | Tree removal and pruning activities were initiated in August 2017, and are ongoing, under the guidance of the BBI Arborist, and in accordance with the Tree Avoidance, Minimization, and Replacement Plan. Tree Removal and Pruning status is provided to the JPB on a regular basis. |
| BIO-6: Pay Santa Clara Valley Habitat Plan land cover fee (if necessary). | х | | | | Complete | Not applicable. The SCVHP does not apply to the Project because TPS2, Option 1 was not selected and OCS does not extend to Communication Hill. This measure is not needed. |
| CUL-1a: Evaluate and minimize impacts on structural integrity of historic tunnels. | X | | | | Upcoming | To be implemented prior to construction in tunnels. |
| CUL-1b: Minimize impacts on historic decorative tunnel material. | Х | | | | Upcoming | To be implemented prior to construction in tunnels. Historic American Engineering Record (HAER) documentation was completed in October 2018, pursuant to this measure. |
| CUL-1c: Install project facilities in a way that minimizes impacts on historic tunnel interiors. | Х | | | | Upcoming | To be implemented prior to construction in tunnels. |

Mitigation Monitoring and

|---|----------------------|--------------|-----------------------|-----------|----------|---|
| Mitigation Measure | Pre- Construction | Construction | Post- Construction | Operation | Status | Status Notes |
| CUL-1d: Implement design commitments at historic railroad stations | x | | | | Complete | The Qualified Architectural Historian completed and submitted the HABS Level III documents to the JPB for all seven of the historic stations. Pole placement has been designed to minimize the visual impact to historic stations and all design changes are reviewed by the Environmental Compliance Lead to ensure the mitigation measure is being implemented as the design of the project progresses. |
| CUL-1e: Implement specific tree mitigation considerations at two potentially historic properties and landscape recordation, as necessary. | x | x | | | Complete | It was determined that the project is not acquiring any ROW at either of the subject properties so all tree effects would be within the JPB ROW. Therefore, the APE does not include these two historic properties. This measure is no longer needed. |
| CUL-1f: Implement historic bridge and underpass design requirements. | x | | | | Ongoing | This measure is being implemented as described during the design process and will be incorporated into the final design. The four bridges that are included in the MMRP are rail bridges crossing over another feature. Design of the OCS system is taking into account that there are requirements that restrict the design. Thus far, the designs for Construction Segments 2 & 4 are in process and designs are not yet complete. The D-B will forward to the Architectural Historian once complete. |
| CUL-2a: Conduct an archaeological resource survey and/or monitoring of the removal of pavement or other obstructions to determine if historical resources under CEQA or | x | | | | Ongoing | Periodic inspections of ground surface areas along the alignment, in conjunction with cultural monitoring as-needed of project activities in culturally sensitive areas are ongoing. The Archaeological Final |
