

# Quint Street Bridge Project

## Scope & Need

Caltrain will remove the existing Quint Street Bridge which is over 100 years old and is at the end of its useful life with a new berm. The current bridge is deemed structurally deficient, does not meet existing seismic safety standards and must be replaced to ensure the safety of community members and Caltrain passengers. The new berm will be designed to allow for a potential Caltrain station to be located at Oakdale Avenue in the future.

The contract for the Quint Street Bridge Replacement project was awarded to Shimmick Construction Company, Inc. in August 2015.

## Construction Impacts

Closure of Quint Street between Jerrald Avenue and Oakdale Avenue is expected to begin on September 28, 2015 (or after). The San Francisco County Transportation Authority's Quint-Jerrold Connector Road project will follow the berm construction. The planned connector road will link Quint Street, just north of Oakdale Avenue, to Jerrald Avenue via a new road along the west side of the Caltrain tracks. More information regarding the Quint-Jerrold Connector Road project can be found at [www.sfcta.org/quint](http://www.sfcta.org/quint).

During the closure, Caltrain will establish traffic rerouting signs for pedestrians and motorists to help with traffic flow. Please see traffic rerouting map on the back for details.

While a majority of the work will be completed during the day, in order to maintain rail operations, night and weekend work will be required for some construction activities.

Community members may experience temporary, localized noise impacts during construction. Construction crews will use best management practices to reduce noise and other impacts to the community and Caltrain will notify community members well in advance about construction activities that could result in noise impacts.

## Public Outreach & Community Engagement

In partnership with the San Francisco County Transportation Authority, Caltrain has participated in numerous community outreach events and meetings starting in 2012. Outreach activities included several open houses, multiple presentations to community groups and commissions, and multilingual notifications through email, mailings and flyers.

Caltrain will continue to engage the public in multiple venues to provide more information and collect feedback about the project.

Nearby residents and businesses will be notified via mail about upcoming construction impacts. Caltrain will continue to work with the San Francisco County Transportation Authority to build awareness about the project and its impacts.

## Project Schedule

- Finalize Design: December 2014
- Berm Advertise and Procurement: December 2014 – April 2015
- Berm Construction: September 2015 – April 2016
