Re: Caltrain Electrification Project Update

ELECTRIC VEHICLE UPDATE

Manufacturing marked a major milestone with the carshell of the first trainset passing multiple structural load tests. Train manufacturing continues its busy schedule, with three trainsets now in production.

A mock-up of the new electric train cab has been installed, which will assist the crew in learning the different functionalities and features of the new high-performance trains' control car.

ELECTRIFICATION INFRASTRUCTURE UPDATE

Construction to make Caltrain a modern, electric commuter rail system continues. In August, crews finished the first pass of potholing for utilities in San Francisco and Brisbane while continuing to pothole from Belmont to San Jose. Crews also continued tree work in Menlo Park and San Jose as well as the construction of the Traction Power Substation in San Jose.
