

San Mateo Replacement Parking Track City Council Study Session

Thank you for your interest in the proposed replacement San Mateo Parking Track that was removed to facilitate the construction of the 25th Avenue Grade Separation Project, which will improve safety and traffic flow, reduce horn noise, and result in a new Hillsdale Station in the City of San Mateo.

We wanted to let you know about the City Council Study Session on this topic on February 18, 2020 (details below). We are finalizing the technical assessment of the suggestions that were proposed by residents on January 21, 2020. The assessment will be posted to the website before the study session and we will again notify the distribution list once it's available for review.

San Mateo City Council Study Session

February 18, 2020

5:30 p.m. to 7:00 p.m.

San Mateo City Hall

330 W. 20th Avenue, San Mateo, CA 94403

Please note, all materials and resources from the previous meetings can be found at www.caltrain.com/SMParkingTrack.

Background Information

A "parking track" is a temporary storage space for train equipment. The anticipated use of a San Mateo parking track is 1-2 times a month. Parking tracks allow for efficient use of limited work windows to keep the railroad functioning properly.

The previous San Mateo Parking Track was in existence prior to Caltrain becoming the operator of passenger service. Located in the Bay Meadows area, it was used by Caltrain for 25 years until the grade separation project necessitated its removal.

There are over a dozen parking tracks distributed in residential and commercial areas along the corridor. There is only one maintenance yard, which is a large 20 acre multi-acre complex operation and facility that is located in San Jose.
