

Thank you for your interest in the future set-out track project. Currently, Caltrain is starting to evaluate possible alternative locations for a set-out track that will replace as close as possible the set-out track functions that were displaced for the San Mateo 25th Avenue Grade Separation Project.

Based on community feedback, Caltrain created a public portal where community members can suggest possible alternative locations. We've also posted Caltrain's set-out track [design standards](#). Thank you to those who have already entered suggestions. **Please enter your suggestion by Sunday, July 14** so the alternatives analysis process can further proceed. Link here:

<https://docs.google.com/spreadsheets/d/1ghABfSld0fiBdqRLGjJ2v5-Ns0H3BpK37GPjIA7jnY/edit#gid=0>

Another community meeting will be held regarding any potential alternative locations to update the community and take additional feedback. In advance of the meeting, Caltrain will send mailers to an expanded radius; promote the meeting on social media and the Caltrain website; email the project's distribution list; send a press release; and coordinate with the City on posting to the City website and locations such as NextDoor.

In addition, we wanted to give you updates on the following:

- We've heard that there's some confusion regarding the differences between a set-out track and a maintenance yard. Thus, a more detailed explanation is included in the [updated FAQs](#) (see last page).
- The "subscribe" button has also been added to the webpage so others can easily join this project email distribution list. The project webpage is at [www.caltrain.com/HP\\_Set-OutTrack](http://www.caltrain.com/HP_Set-OutTrack).
- As mentioned at the community meeting, the electrification project has been working in the area. If you have any questions about this work you can reach the electrification project at [calmod@caltrain.com](mailto:calmod@caltrain.com) or (650) 399-9659.

Please note, that in the coming weeks crews will install a drainage ditch to prevent any excess runoff and will hydroseed the area where dirt was distributed. No other work other work will be done to install any component of the set-out track at this location before additional public meetings, comments, and exploration of potential alternative locations.

Thank you and I look forward to staying in touch.

Best,  
Lori
