

San Mateo Replacement Parking Track

Upcoming Potholing Work

Since February 2020, the City and Caltrain have been working with the community on neighborhood enhancements specific for the replacement parking track. Comments on the draft design were received by Hayward Park neighbors in May 2020 and incorporated where appropriate (see the [Mayor's Letter](#) at www.caltrain.com/SMParkingTrack). One step toward the final design is potholing to determine the exact location of existing fiber optic cable.

POTHOLING ACTIVITY

Upcoming potholing will be done within the Caltrain right-of-way, between 9th and 14th Avenues. The activity will start as early as November 30, 2020, and is expected to last three to five days. Work hours will be from 7:00 a.m. to 4:00 p.m. Potholing crews will access the site from 9th Avenue.

Potholing is site specific and does not create any excess noise, vibration, or emit any odors.

BACKGROUND INFORMATION

The parking track project will replace the formerly existing San Mateo parking track which was removed to facilitate the construction of the [25th Avenue Grade Separation Project](#). A parking track is a temporary storage space for train equipment that allows for efficient use of limited work windows to keep the railroad functioning properly. The anticipated use of the San Mateo parking track is approximately once a month.

The previous San Mateo Parking Track was in existence prior to Caltrain becoming the operator of passenger service. Located in the Bay Meadows area, it was used by Caltrain for 25 years until the grade separation project necessitated its removal. There are over a dozen parking tracks distributed in residential and commercial areas along the corridor. There is only one maintenance yard, which is a large 20 acre multi-acre complex operation and facility that is located in San Jose.
