

San Mateo Replacement Parking Track Neighborhood Enhancements

Thank you for your continued interest in the neighborhood enhancements for the San Mateo Replacement Parking Track. We wanted to update you on the project. Due to COVID and other considerations, the project has been delayed and construction will not occur before fall 2022. Caltrain will continue to inform residents and businesses about the project's progress. The project website will maintain the project's historical documents and continue to be updated.

Background Information

The parking track project will replace the formerly existing San Mateo parking track which was removed to facilitate the construction of the [25th Avenue Grade Separation Project](#). A parking track is a temporary storage space for train equipment that allows for efficient use of limited work windows to keep the railroad functioning properly. The anticipated use of the San Mateo parking track is approximately once a month.

The previous San Mateo Parking Track was in existence prior to Caltrain becoming the operator of passenger service. Located in the Bay Meadows area, it was used by Caltrain for 25 years until the grade separation project necessitated its removal. There are over a dozen parking tracks distributed in residential and commercial areas along the corridor. There is only one maintenance yard, which is a large 20 acre multi-acre complex operation and facility that is located in San Jose.
