Larry Klein
574 South Frances Street
Sunnyvale, CA 94086

Dear CAC Member Klein,

Thank you for making the 25th Avenue Grade Separation Project a reality. After four years of construction and over a decade of planning, the 25th Avenue Grade Separation Project delivers on the promise of safer, more efficient, and more connected transportation infrastructure.

Together, we successfully separated the train tracks from the road at a popular crossing, improving safety for all modes of travel and reducing train horn noise and congestion.

A new Hillsdale Station now serves riders with improved amenities and a center-boarding platform, eliminating the need for riders to wait at a crossing gate to move between platforms. The station serves as a major access point to world-renowned company headquarters, shopping and entertainment, local restaurants, and a variety of neighborhoods.

New grade-separated, east-west connections at E. 28th Avenue and E. 31st Avenue improve traffic flow and bring neighborhoods together. The project also installed foundations for Caltrain Electrification, which will expand capacity, improve speeds, and reduce noise and pollution impacts on local communities. This lays the groundwork for Caltrain's 2040 Service Vision that when fully achieved, will improve regional and statewide connectivity, reduce travel times, and support ridership the equivalent of adding 5.5 new freeway lanes worth of capacity to US 101. The Service Vision will also deliver tremendous environmental benefits, reducing 110 metric tons of GHG emissions every day and taking nearly a million vehicle miles off Bay Area roads.

Thank you for your tireless efforts, dedication, patience and enthusiasm for a project that provides benefits today and for generations to come.

With gratitude,
