

CALTRAIN ELECTRIFICATION

1st AVENUE LANE CLOSURE NOTICE | September 2023

UPCOMING ACTIVITIES AND LANE CLOSURE

September 19, Caltrain will be performing conduit work that will require a partial lane closure of the 1st Avenue railroad crossing to vehicle traffic. The temporary lane closure is required due to construction equipment and crews entering and exiting the Caltrain right-of-way at 1st Avenue.

Work will take place on from September 19 to September 22, between the hours of 8:30 a.m. and 4:30 p.m.

1st Avenue will be partially closed during construction which will require flaggers to be present for traffic control. Weekend work will not be required.

Directional signs will direct vehicle and bicycle traffic to use the eastbound lane of 1st Avenue as a detour during construction. Crosswalks on the north and south side of 1st Avenue will remain open for pedestrian traffic.

A lane closure map is provided at the bottom of this notice for vehicle and bicycle traffic.

CONSTRUCTION ACTIVITIES

During the closure, crews will be performing conduit installation work for Caltrain Electrification. Work will consist of excavation, placement of cable, and repaving. Crews will utilize equipment that requires the temporary lane closure of 1st Avenue.

Crews will also be working along the Caltrain corridor to install foundations outside of the closure hours noted above. Work may take place during the day and at night, with night work occurring between 9 p.m. and 6 a.m. There may also be occasional 24-hour work on weekends.

Caltrain will work with contractors to minimize night work to limit the impact to surrounding communities; however, some work must be performed at

night in order to maintain regular Caltrain service. To mitigate noise and other impacts during night activities, the field team will utilize acoustical noise barrier blankets and will position lights away from residential and business areas. Caltrain has established a dedicated project hotline and email for residents concerned about these potential impacts.

PROJECT OVERVIEW

Over the last decade, Caltrain has experienced a substantial increase in ridership and anticipates further increases in ridership demand as the Bay Area's population grows. Caltrain Electrification, scheduled to be operational by 2024, will electrify and upgrade the performance, operating efficiency, capacity, safety, and reliability of Caltrain's commuter rail service.

Caltrain electrification is a key component of the Caltrain Modernization Program and consists of replacing diesel-hauled with an electric train system for services between Fourth and King Street Station in San Francisco and the Tamien Station in San Jose. The project will include the installation of new electrical infrastructure and the purchase of electric trains.

CONTACT INFORMATION

Caltrain has established a project information line and project e-mail for Caltrain Electrification to record and respond to questions and comments from residents and stakeholders.

The project information line can be reached at **650.399.9659** or toll free at **800.660.4287**.

The project e-mail is calmod@caltrain.com

Sign up for weekly construction updates can be found online at: www.caltrain.com/projects/electrification/get-involved
