

CALTRAIN ELECTRIFICATION

OLD COUNTY ROAD NEAR BRITTAN AVE LANE CLOSURE NOTICE | November, 2023

UPCOMING ACTIVITIES AND LANE CLOSURE

Beginning November 13 through November 17 Caltrain will be performing low-voltage service installation work that will require a temporary closure of one lane at a time of Old County Road near the intersection of Brittan Avenue to vehicle and bicycle traffic. The temporary lane closure is required due to construction equipment and crews entering and exiting the Caltrain right-of-way.

Work will take place from 9 a.m. to 3 p.m. Monday November 13 through Friday November 17. Only one lane will be closed at a time.

Directional signs will direct traffic from the closed lanes to open lanes of Old County Road. Flaggers will be present to assist vehicle and bicycle traffic.

A detour map is provided at the bottom of this notice for vehicle and bicycle traffic.

CONSTRUCTION ACTIVITIES

During the closure, crews will install low-voltage service equipment to help power infrastructure in support of the overhead contact system (OCS) infrastructure. Work will include potholing for utilities, installation of conduit, and repaving.

Crews may also be working along the Caltrain corridor to install OCS infrastructure outside of the closure hours noted above. Work may take place during the day and at night, with night work typically occurring between 10 p.m. and 6 a.m. There may also be occasional 24-hour work on weekends.

Caltrain will work with contractors to minimize night work to limit the impact to surrounding communities; however, some work must be performed at night in order to maintain regular Caltrain service. To mitigate noise and other impacts during night activities, the field

team will utilize acoustical noise barrier blankets and will position lights away from residential and business areas. Caltrain has established a dedicated project hotline and email for residents concerned about these potential impacts.

PROJECT OVERVIEW

Over the last decade, Caltrain has experienced a substantial increase in ridership and anticipates further increases in ridership demand as the Bay Area's population grows. Caltrain Electrification, scheduled to be operational by 2024, will electrify and upgrade the performance, operating efficiency, capacity, safety, and reliability of Caltrain's commuter rail service.

Caltrain electrification is a key component of the Caltrain Modernization Program and consists of replacing diesel-hauled with an electric train system for services between Fourth and King Street Station in San Francisco and the Tamien Station in San Jose. The project will include the installation of new electrical infrastructure and the purchase of electric trains.

CONTACT INFORMATION

Caltrain has established a project information line and project e-mail for Caltrain Electrification to record and respond to questions and comments from residents and stakeholders.

The project information line can be reached at **650.399.9659** or toll free at **800.660.4287**.

The project e-mail is calmod@caltrain.com

Sign up for weekly construction updates can be found online at: www.caltrain.com/projects/electrification/get-involved
