

CALTRAIN ELECTRIFICATION

WILLIAMS AVENUE LANE CLOSURE NOTICE | May 2024

UPCOMING ACTIVITIES AND LANE CLOSURE

From May 6 to May 10, Caltrain will be performing conduit trenching work in Redwood City that will require partial closures of the cul-de-sac of Williams Avenue near 4th Avenue to vehicle and pedestrian traffic. The temporary lane closures are required due to excavation and construction equipment and crews entering and exiting the work area along Williams Avenue near the Caltrain right-of-way.

Work will take place on May 6 through May 10 between 8 a.m. and 4 p.m. on Mondays through Fridays only.

Construction signs and illuminated directional signs will direct the traffic from the closed lanes along Williams Ave to the open lanes in the cul-de-sac. Traffic cones will be placed to mark the lane closures. Only one side of the cul-de-sac will be closed at a time, and one side will remain open during construction.

A lane closure map is provided at the end of this notice for vehicle and pedestrian traffic.

CONSTRUCTION ACTIVITIES

During the closure, crews will trench to install conduit for Caltrain Electrification. Work will consist of excavation, replacement of soil and repaving.

Crews may also be working along the Caltrain corridor to install OCS infrastructure outside of the closure hours noted above. Work may take place during the day and at night, with night work occurring between 10 p.m. and 5 a.m. There may also be occasional 24-hour work on weekends.

Caltrain will work with contractors to minimize night work to limit the impact to surrounding communities; however, some work must be performed at

night in order to maintain regular Caltrain service. To mitigate noise and other impacts during night activities, the field team will utilize acoustical noise barrier blankets and will position lights away from residential and business areas. Caltrain has established a dedicated project hotline and email for residents concerned about these potential impacts.

PROJECT OVERVIEW

Over the last decade, Caltrain has experienced a substantial increase in ridership and anticipates further increases in ridership demand as the Bay Area's population grows. Caltrain Electrification, scheduled to be operational by 2024, will electrify and upgrade the performance, operating efficiency, capacity, safety, and reliability of Caltrain's commuter rail service.

Caltrain electrification is a key component of the Caltrain Modernization Program and consists of replacing diesel-hauled with an electric train system for services between Fourth and King Street Station in San Francisco and the Tamien Station in San Jose. The project will include the installation of new electrical infrastructure and the purchase of electric trains.

CONTACT INFORMATION

Caltrain has established a project information line and project e-mail for Caltrain Electrification to record and respond to questions and comments from residents and stakeholders.

The project information line can be reached at **650.399.9659** or toll free at **800.660.4287**.

The project e-mail is calmod@caltrain.com

Sign up for weekly construction updates can be found online: www.caltrain.com/projects/electrification/get-involved
